

Close the gap between data and instruction.

When it comes to teaching, every moment matters. And with the increased rigor of new standards, it's more important than ever to close the achievement gap for struggling students. mCLASS Intervention software can make a difference in your school today by helping K–6 teachers immediately identify at-risk students and provide the help needed to build a strong foundation in literacy.

Benefits of mCLASS Intervention:

- **Receive the right resources at the right time** by automating the time-consuming process of differentiating instruction, affording teachers more time to teach.
- **Make the most of every instructional moment** with step-by-step instructions that support flexible delivery by teachers, coaches, specialists, paraprofessionals or other qualified volunteers.
- **Bring lessons to life** through engaging instructional content and short, game-like activities that motivate students.
- **Rely on a skills-based model and ongoing instructional support** provided by our staff of former educators to ensure successful implementation.
- **Use comprehensive reports** that identify challenges and instructional best practices to support districtwide decisions and resource allocation.

2019-2020 LAUSD Pricing
