

# Bring the gold standard of early literacy to your students.

Grades K–6

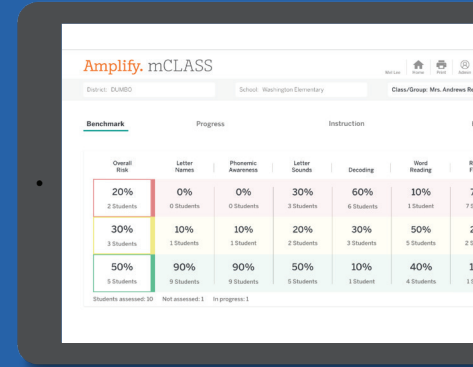

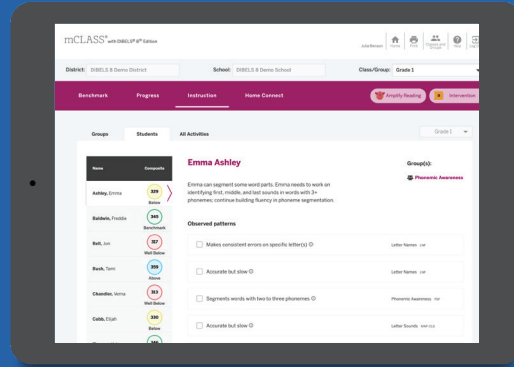

A breakthrough suite for developing confident readers.

Every child is unique. For an educator like you, making sure your most vulnerable students don't get lost or discouraged along this journey is as important as keeping the rest of your class on track. **mCLASS®** is an all-in-one early literacy assessment, intervention, and instructional suite that enables educators to understand every student as a reader, providing direct measurement and targeted instruction in all core foundational reading skills.

mCLASS helps you make data-driven, engaging literacy instruction a reality for each student. **That is the power of mCLASS.**

mCLASS®

We are the gold standard in early literacy.  
Our proven early literacy suite of assessment,  
instruction, and intervention is more powerful  
than ever.

## What sets mCLASS apart?

### The power of understanding every student

Precise one-minute measures based on over three decades of predictive data allow mCLASS to provide the right instruction for each student.

### Immediate support for at-risk students

Universal and dyslexia screening in one validated assessment tool identifies your at-risk students at the earliest levels.

### Rigorous, teacher-led intervention

Receive the analytical tools and resources needed to deliver targeted, staff-led intervention to students most in need of support.

### Blended instruction

mCLASS data drives targeted placement into the adaptive Amplify Reading curriculum, an instructional world of skill-building games that develop fluency and comprehension.

### Deep insights

Intuitive reporting for teachers and administrators supports your data-driven decisions to achieve student growth at every level.

### Comprehensive early literacy

The latest version of the trusted DIBELS® assessment and our Text Reading and Comprehension suite ensure you're measuring all the skills critical to reading success.
