AmplifyScience

Welcome to Amplify Science

Amplify Science is a breakthrough curriculum designed from the ground up for the Next Generation Science Standards and three-dimensional learning. Authored by the industry-leading team at UC Berkeley's Lawrence Hall of Science, Amplify Science is a highly engaging, phenomena-based curriculum that integrates the latest practices in science teaching and learning, as well as interactive digital tools and hands-on activities, to teach students to think, read, write, and argue like real scientists and engineers.

Amplify is Chicago Public Schools' recommended K–8 core science instructional material. With the purchase of the new science materials, schools will benefit from:

- Ongoing professional development supports included with CPS bundle purchase
- Negotiated pricing for Chicago Public Schools bundles
- Supplemental resources and curricular supports aligned to the recommended programs available through the CPS Department of STEM

What sets Amplify Science apart?

- Authored by the industry-leading science curriculum team at **UC Berkeley's Lawrence Hall of Science**, who have 50 years of experience in K–12 science education and who will continue to enhance and update the program for years to come
- New curriculum **built to meet 100 percent of the Next Generation Science Standards**
- Highly engaging curriculum that invites students to take on the role of a scientist or engineer in every unit to **solve relevant, real-world problems**
- **Flexible, truly blended program** combining comprehensive print components and compelling online content with hands-on kits in every unit
- **Robust teacher support** for ease of use by a wide range of teachers in diverse classroom contexts, with carefully crafted lessons, standards alignment, differentiation strategies, and ELL supports throughout the program

To learn more and explore the program, visit amplify.com/chicago.

K-5 materials

Every Chicago Public Schools elementary school classroom bundle comes with:

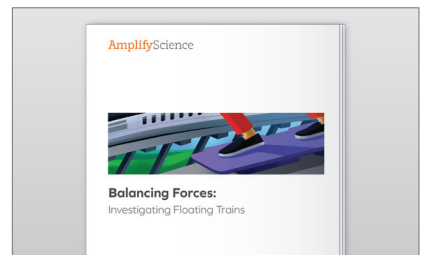

1. **Materials kits** for all units including everything needed for the hands-on investigations*

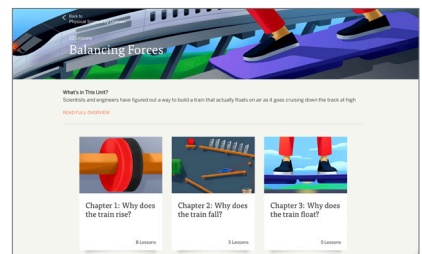

2. **Student books** which enhance science topics and allow students to practice reading within the science content area (five titles per unit, 18 copies per title for partner reading) as well as teacher access to the digital student book library (one-year subscription)

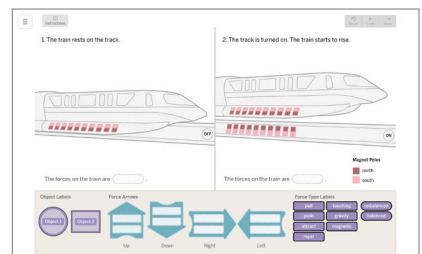

3. **Student Investigation Notebooks** which allow students to interact with content while taking notes, answering questions, and conducting investigations

4. The **Digital Teacher's Guide**** which includes step-by-step lessons, differentiation supports, professional learning resources, and more

5. **Student practice apps** (grades 2+) and **sims** (grades 4–5) which help students with modeling, graphing, and sorting information as well as gain insight into processes that occur on the microscopic scale, or to speed up processes that might otherwise take thousands or millions of years to observe

* Some commonly found materials are sourced by the teacher

** Also available in print

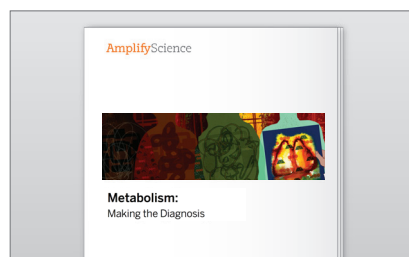

6-8 materials

Chicago Public Schools middle school classrooms will use:

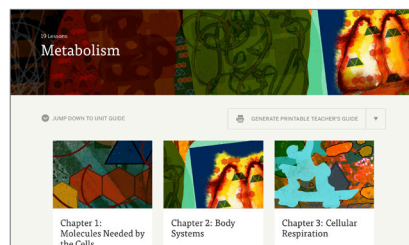

1. **Materials kits** for all units including everything needed for the hands-on investigations*

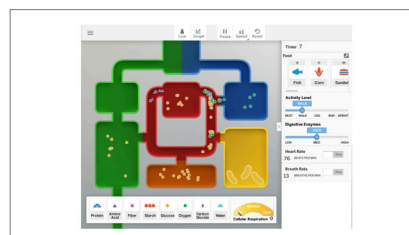

2. **Student Investigation Notebooks** (optional) which allow students to interact with content while taking notes, answering questions, and conducting investigations

3. The **Digital Teacher's Guide**** which includes step-by-step lessons, differentiation supports, professional learning resources, and more

4. **Sims and digital modeling tools** which help students with modeling, graphing, and sorting information as well as gain insight into processes that occur on the microscopic scale, or to speed up processes that might otherwise take thousands or millions of years to observe

* Some commonly found materials are sourced by the teacher

** Also available in print

Explore Amplify Science

You can explore Amplify Science today by going online to amplify.com/chicago. There you will be able to read more about the components of the program, dive into the research behind the approach, and request access to the Teacher's Guide where you will gain access to 100 percent of the instruction.

While there, you will also want to access an on-demand webinar on Amplify Science.
