Professional Learning Workshop
Los Angeles Unified School District

Title: Amplify Science Remote Learning Presentation (TK)

Session Description: In this session, participants will frame the day by engaging in discussion around best practices for remote instruction with TK students. They will unpack and experience a remote Amplify Science lesson in order to think about how they might adapt the curriculum for synchronous remote learning. Participants will have an opportunity to think about interdisciplinary connections as well as ways to engage families during remote learning. Participants will receive support from an Amplify Science professional learning specialist who will guide them through planning protocols.

Recommended Audience: Teachers who have attended an orientation training

Series Outcomes
Participants will be able to:
- Internalize tips and strategies for remote instruction
- Plan how they will leverage Amplify Science in a remote setting for back-to-school

Agenda
- **Framing the day**
