

# Amplify Science

New York City

## New Administrators' Orientation Grades 6-8

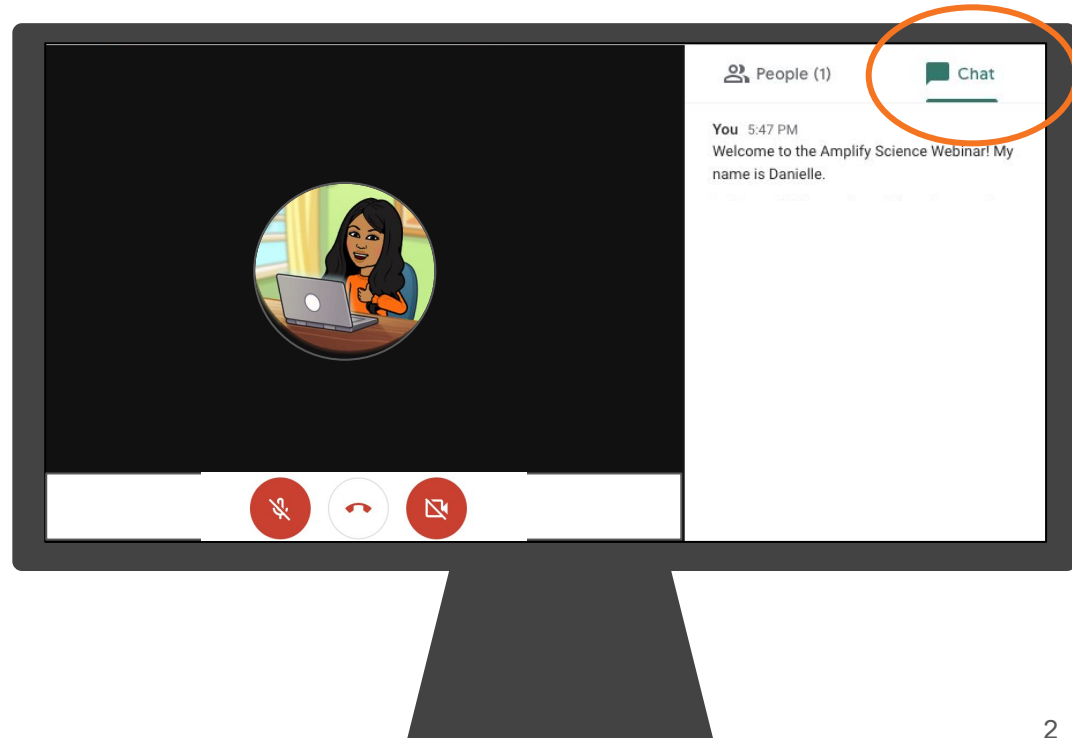

August 6, 2020  
Presented by Your Name

# Introductions! Who do we have in the room?

## Think-Type-Chat!

- Please share:
  - Your name
  - Your DBN
  - Something you're excited about with implementing Amplify Science.

# Overarching goals

By the end of this workshop, you will be able to:

- Recognize how lessons engage students in three-dimensional learning.
- Understand how the program’s multimodal approach supports students in figuring out the unit phenomenon.
- Become familiar with “look fors” that administrators should see in an effective three dimensional science instruction.
- Discuss ways in which administrators can support the teaching of science in the coming school year.
- Make an informed decision about which of the Amplify Science Hybrid Learning Resources (@Home Unit and @Home Videos) will best support their teachers.

# Remote Professional Learning Norms

Take some time to orient yourself to the platform

- *“where’s the chat box? what are these squares at the top of my screen?, where’s the mute button?”*

Mute your microphone to reduce background noise unless sharing with the group

The chat box is available for posting questions or responses to during the training

Make sure you have a note-catcher present

Engage at your comfort level - chat, ask questions, discuss, share!

# Plan for the day

- **Framing the day**
  - What is Amplify Science?
- **Phenomenon-based learning**
  - What is phenomena-based instruction?
  - What does this look like in Amplify Science?
- **Supporting instruction**
  - Progress builds and assessments
- **Supporting implementation**
  - Administrator resources
  - Remote & hybrid resources
- **Closing**
  - Reflection & survey

# Capturing key takeaways!

# What does phenomenon-based instruction look like in Amplify Science?

19 Lessons

# Metabolism

Introducing the  
phenomenon and  
setting the purpose  
for investigating

Pay attention to the student role and the phenomenon that students are asked to figure out.

An abstract, colorful background featuring a woman's face in profile on the right side, rendered in a golden-yellow, textured style. The face is surrounded by various geometric shapes, including hexagons and circles, in shades of blue, green, and red. Red, swirling lines resembling molecular paths or neural connections are overlaid on the composition. The overall aesthetic is artistic and scientific.

**Metabolism**

# **Lesson 1.2: Welcome to Medical School**

# Activity 1

# Warm-Up

Today, we will begin a new unit called **Metabolism**.

We will start with a Warm-Up each day to get us thinking about science ideas. For today's Warm-Up, you will watch and respond to a video that introduces your new role as **medical students**.

## Warm-Up

Why do you think your new patient, Elisa, is feeling tired all the time? Explain your ideas.

Not getting enough sleep  
Eating the right foods  
Medical condition

Why do you think your new patient, Elisa, is feeling tired all the time?  
Explain your ideas.

### Claims

Elisa is feeling tired because she:

You have a lot of **good ideas**. I think we can group these into several “umbrella” **claims** that we can try to **investigate** further. I will write them on the board.

## Activity 2

# Introducing the Metabolism Simulation

This simulation is called the *Metabolism* Simulation. It's a **scientific model** of the human body that simulates many things that happen inside the human body.

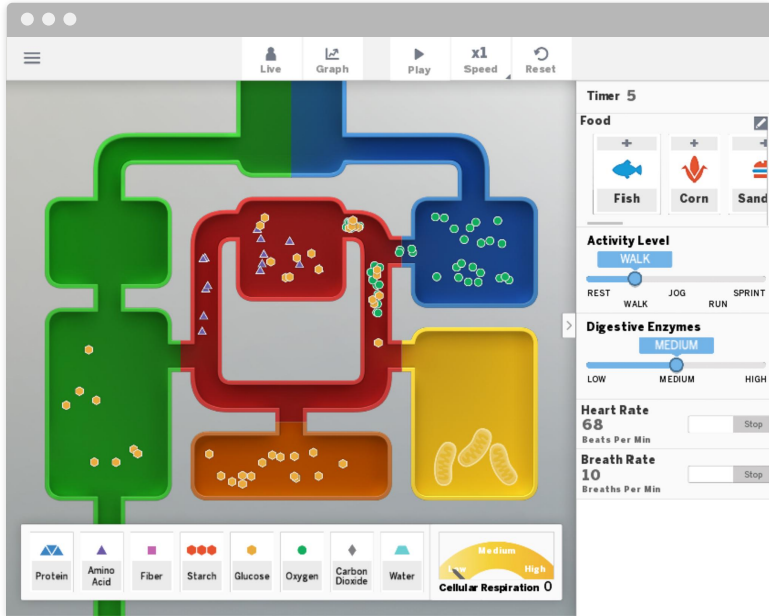

This **key** identifies the different types of **molecules** entering the system.

By pressing them, you can also turn the molecule visibility **off and back on**.

The image shows a screenshot of a virtual biology simulation interface. The main area displays a diagram of a digestive system with various colored chambers and pipes. The chambers are labeled with icons representing different molecules: Protein (blue triangles), Amino Acid (purple triangles), Fiber (pink squares), Starch (red circles), Oxygen (green circles), Carbon Dioxide (black diamonds), and Water (teal triangles). The diagram is connected to a central brown chamber at the bottom. To the right of the diagram is a control panel with several sections: a 'Timer' showing 23, a 'Food' section with buttons for Fish, Corn, and Sand, an 'Activity Level' section with a slider set to WALK, and a 'Digestive Enzymes' section with a slider set to MEDIUM. Below these are 'Heart Rate' (67 Beats Per Min) and 'Breath Rate' (12 Breaths Per Min) displays, each with a 'Stop' button. At the bottom of the interface is a 'Molecule Key' with buttons for Protein, Amino Acid, Fiber, Starch, Oxygen, Carbon Dioxide, and Water, along with a 'Cellular Respiration' gauge set to 1.

What did you **notice** about the Sim?

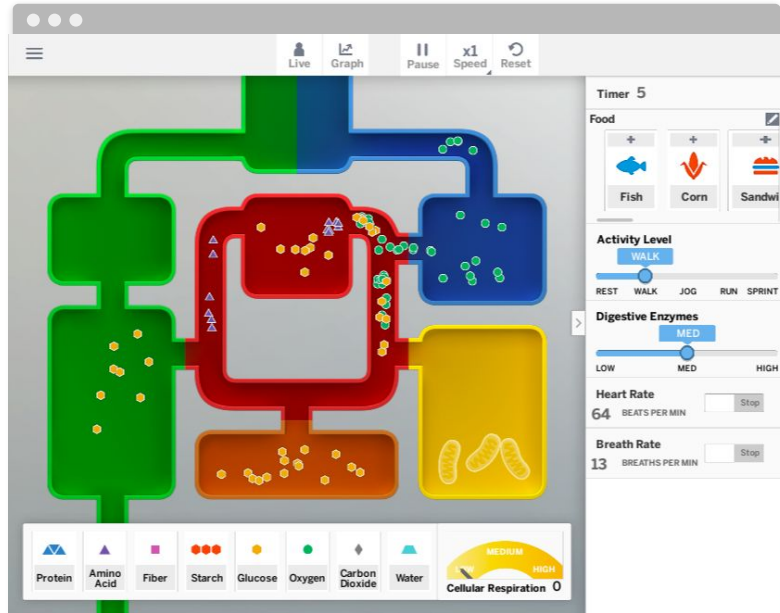

The screenshot shows a simulation window titled "One of the Trillions of Cells in the Human body". The main area features a large yellow container representing a cell, with three orange mitochondria inside. A magnifying glass icon is in the top right of the cell. Below the cell, a grey box is labeled "MITOCHONDRIA".

The interface includes a top toolbar with icons for "Live", "Graph", "Play", "x1 Speed", and "Reset". On the right side, there are several control panels:

- Timer 4**: Shows two grey boxes labeled "1" and "2".
- Food Queue**: Shows two grey boxes labeled "1" and "2".
- Activity Level**: A slider set to "WALK" between "REST" and "SPRINT".
- Digestive Enzymes**: A slider set to "MED" between "LOW" and "HIGH".
- Heart Rate**: 69 BEATS PER MIN, with a "Stop" button.
- Breath Rate**: 10 BREATHS PER MIN, with a "Stop" button.

At the bottom, there is a row of icons for various substances and processes: Protein, Amino Acid, Fiber, Starch, Glucose, Oxygen, Carbon Dioxide, Water, and Cellular Respiration (set to "MEDIUM").

The **trillions of cells** in the body have some **similarities** in the ways they function, so we can learn more about what all cells need by **observing one cell** in the Simulation.

**Observe** the Sim a second time.

This time, watch what happens to the **food and air** that enter this healthy Simulation body.

## Activity 3

# Returning to the Patient

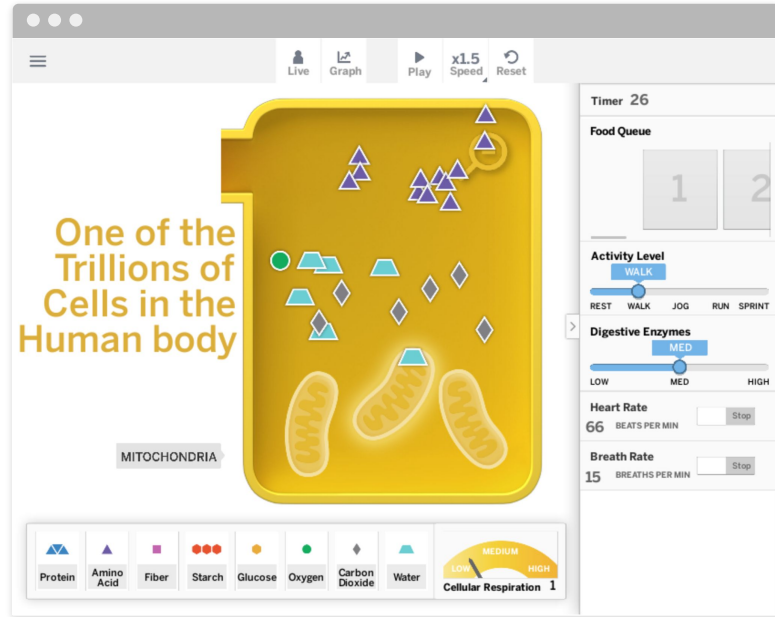

## Vocabulary

**metabolism**

the body's use of molecules for energy and growth

In the Sim, you observed that in a functioning, healthy body, certain **molecules that come from food and air** are transported into the body's **cells**.

# Digital classroom wall

## Unit Question

How do the trillions of cells in the human body get what they need to function, and what do the cells do with the things they absorb?

Metabolism - Unit Question - Lesson 1.1 - AMP12022.1.1.M7  
© The Regents of the University of California. All rights reserved.

## Chapter 1 Question

Why does Elisa feel tired all the time?

Metabolism - Chapter 1 Question - Lesson 1.1 - AMP12022.1.1.M7

## Activity 4

# Homework

# Homework

---

## Testing Diets in the Sim

In this homework, you will experiment with different diets in the Simulation to see how the diet affects the number of molecules getting to the cells.

1. Launch the [Metabolism Simulation](#).
2. Select HEALTHY BODY and then select TEST.
  - In Test Mode, you set up a pre-planned diet by pressing on items under Add Food Source. Then you press Play and observe the Simulation. The diet you selected is fed to the body automatically, and the test runs until the Timer reaches 200. During the test, you can observe the *Metabolism* Sim in the Live View or switch to the Graph View. In the Graph View, you can see the final results for Total Molecules Absorbed by Cells, which is the data you will record below.
3. Plan at least three different tests of the diet for the healthy body. Record your plan in the Diet Plan tables below.
4. Run your tests and record your results: the number of molecules absorbed by the cells.

# End of Lesson

# Active reading: student articles

- Articles provide a valuable source of evidence to figure out phenomena.
- Explicit instruction in reading like a scientist.
- Multiple reads of the same text each with a different purpose.

## Molecules Cells Need

When your body is healthy, it runs so smoothly that you probably don't even notice it: without thinking about it, you can get up in the morning, breathe, laugh, dance, grow, fight off diseases, and live your life! But what makes a body healthy, and how does it stay that way? In a healthy body, all the systems work together to make sure every cell gets the molecules it needs: oxygen, glucose, and amino acids. Metabolism is the body's use of these molecules for energy and growth.

We need to breathe in oxygen molecules from the air around us to keep our bodies alive. Our bodies get other important molecules, such as amino acids and glucose, from the food we eat.

Amino acid molecules are the building blocks of proteins, and we get them from protein-rich foods like beans, meat, and eggs. We get glucose molecules mainly by breaking down foods that contain starch, such as fruits, vegetables, and grains.

The oxygen, glucose, and amino acid molecules you get from air and food are the fuel your body needs to function every day. Without the molecules, your cells can't do what they need to do to keep your body healthy. Many medical conditions cause problems because they can keep these molecules from reaching your cells consistently.

food → large protein molecule → small amino acid molecule

Many foods, such as eggs, contain protein. Large protein molecules are made up of smaller molecules called amino acids.

food → large starch molecule → small glucose molecule

Many foods, such as bread, contain starch. Large starch molecules are made up of smaller molecules called glucose.

Where does the body get glucose, amino acids, and oxygen molecules?

What might happen if the body doesn't take in one or all of these molecules?

# Returning to Elisa's problem

## Claims:

- ~~Elisa isn't getting enough sleep.~~
- ~~Elisa is not eating enough food or not eating the right foods.~~
- Elisa has a medical condition.

### Healthy Sleep Comparison

Average Teenage Sleep Patterns	Elisa's Sleep Pattern
Many scientific studies of teenagers show that most healthy teenagers get between 8 and 10 hours of sleep each night.	Elisa's sleep journal shows that she is getting about 9 hours of sleep every night.

### Healthy Eating Comparison

Average Teenage Eating Habits	Elisa's Eating Habits
A scientific study done on 1,000 healthy 14-year-olds found that they ate between 5 and 8 servings of starch per day and between 1 and 4 servings of protein per day.	Elisa's food journal shows that she ate between 6 and 8 servings of food that contained starch every day. She ate between 2 and 4 servings of food that contained protein every day.

# Advanced Literacies for Academic Success

- **Hallmark 1:** Work with a variety of texts that feature big ideas and rich content
- **Hallmark 2:** Engage in talk and discussion to build both conversational and academic language and knowledge
- **Hallmark 3:** Write to build language and knowledge
- **Hallmark 4:** Study a small set of high-utility vocabulary words and academic language structures to build breadth and depth of knowledge
- **Hallmark 5:** Use Schoolwide protocols to support reading, writing, speaking and Listening

# Reflecting on phenomenon-based learning

# Example lesson reflection

## Think-Type-Discuss

What new insights do you have about phenomenon-based learning?

What connections did you notice to Advanced Literacies?

  - Reflection & survey

# Administrator Resources

# Getting Started Look-For Tool

## Amplify Science: Getting started look-for tool

**Look for #1: Students are accessing the resources:** This category is intended to highlight visible signs of using the Amplify Science curriculum. These observations can be made over 5-10 minutes or longer.

Sample evidence through observations and questions	Notes and observations
<p><b>Classroom environment look-fors:</b></p> <ul style="list-style-type: none"> <li>• Classroom wall</li> <li>• Co-constructed charts</li> <li>• Established routines for ease of access to resources</li> <li>• Projections and posters are clear</li> </ul> <p><b>Student look-fors:</b></p> <ul style="list-style-type: none"> <li>• Referencing classroom wall resources as appropriate</li> <li>• Accessing digital tools, print, and physical resources with ease</li> </ul>	

**Multiple sources to Investigate Phenomena.** This category is intended to highlight 3-D learning. These look-fors need at least 15 minutes to a full

lesson you are observing for the specific core ideas, crosscutting concepts and

figuring out phenomena like a scientist, engaged in 3-D learning. You will visualize, during which they use academic language and unit words to opportunities to construct understanding.

Notes and observations

**Progress Build.** This category is intended to highlight how students are working towards meeting

how students constructing increasingly complex explanations over time. You will observe students working towards meeting

Notes and observations

<p><b>Student look-fors:</b></p> <ul style="list-style-type: none"> <li>• Students reading</li> <li>• Students discussing</li> </ul> <p><b>Student Questions to ask:</b></p> <ul style="list-style-type: none"> <li>• What are you figuring out today?</li> <li>• What can you tell me about the chapter question?</li> <li>• How did you figure that out? What is your evidence?</li> </ul>
--

# Getting Started Checklist

## Getting started with 6-8 Amplify Science: Administrator's Guide

Organizational area	Points to remember
<b>INITIAL TRAINING &amp; PROFESSIONAL LEARNING OPPORTUNITIES</b> <ul style="list-style-type: none"> <li>□ Schedule time for teachers to receive training</li> <li>□ Provide an opportunity for teachers to understand your school's vision for implementing Amplify Science prior to their training</li> <li>□ Devise and deliver messaging to parents</li> </ul>	<ul style="list-style-type: none"> <li>• Teacher buy-in</li> </ul>
<b>PACING UNITS THROUGHOUT THE SCHOOL YEAR</b> <ul style="list-style-type: none"> <li>□ Determine pacing/scope and sequence of units and time allocated for daily science instruction in collaboration with the department chair/grade-level lead</li> <li>□ Identify how much time is dedicated to science instruction at each grade level and modify the schedule to accommodate full implementation</li> </ul>	<ul style="list-style-type: none"> <li>• <b>1 Launch unit</b> <ul style="list-style-type: none"> <li>○ 11 lessons</li> </ul> </li> <li>• <b>6 Core units</b> <ul style="list-style-type: none"> <li>○ 19 lessons</li> </ul> </li> <li>• <b>2 Engineering units</b> <ul style="list-style-type: none"> <li>○ 10 lessons</li> </ul> </li> <li>• Year at a glance (pg. 3)</li> </ul>
<b>TECHNOLOGY READINESS &amp; ACCESS</b> <ul style="list-style-type: none"> <li>□ Identify a technology support person (school &amp; district level)</li> <li>□ Test internet connection speeds to ensure successful internet access</li> <li>□ Ensure all teachers have account log-ins and accessed the digital Teacher's Guide and no content filters block access (learning.amplify.com)</li> <li>□ Ensure all teachers establish routines and logistics for device management in their classroom (if applicable)</li> <li>□ Ensure that all teachers are using either Chrome or Safari web browsers</li> <li>□ Devices in-use by teachers (and students) are: iPad 3 or more recent models, MacBook, Chromebooks, or Windows laptops or desktops</li> </ul>	<ul style="list-style-type: none"> <li>• Contact <a href="mailto:scihelp@amplify.com">scihelp@amplify.com</a> if you have any teacher log-in issues.</li> <li>• Technology readiness will support teachers' ability to teach all units and address all standards.</li> </ul>
<b>MANAGING SCIENCE RESOURCES</b> <ul style="list-style-type: none"> <li>□ Appoint a point-of-contact to organize and distribute kit resources for immediate teacher access based on unit order and pacing</li> <li>□ Ensure kit resources are provided to the teacher at least 1 week prior to the expected start of instruction</li> <li>□ Review the materials list inside of each kit, at each grade level, and identify the items on the list that are "teacher provided items"; secure these items at least 1 week prior to the expected start of instruction</li> <li>□ Ensure all teachers establish routines for managing kit resources in their classrooms (manipulatives, Investigations Notebooks, etc.)</li> </ul>	<ul style="list-style-type: none"> <li>• The Amplify Science curriculum integrates hands-on materials and classroom wall resources. Some items are provided in the kit and others are "teacher provided."</li> </ul>
<b>MONITORING INITIAL IMPLEMENTATION</b> <ul style="list-style-type: none"> <li>□ Schedule time to observe initial implementation, at least two weeks after the units' start date (pacing, routines for technology and materials management)</li> <li>□ Visit classes to identify successes/challenges and provide feedback</li> <li>□ Identify successes and coordinate opportunities for peer-to-peer supports to build capacity and consistency of routines</li> <li>□ Devise an ongoing Professional Learning Plan</li> </ul>	<ul style="list-style-type: none"> <li>• Amplify Science: Getting started look-for tool (pgs.12-14)</li> </ul>
<b>SUPPORTING REMOTE LEARNING</b> <ul style="list-style-type: none"> <li>□ First, ask yourself:           <ul style="list-style-type: none"> <li>■ How much time do students have to learn science in the upcoming school year?</li> <li>■ Do your students have access to technology at home, or do you need a print-only solution?</li> </ul> </li> <li>□ Use Amplify Science@Home Units if:           <ul style="list-style-type: none"> <li>■ You have significantly less time to teach science than usual</li> <li>■ You can choose from two different @Home Units formats, based on your students' tech access:               <ul style="list-style-type: none"> <li>■ <b>@Home Packets:</b> print-only version</li> <li>■ <b>@Home Slides:</b> digital version, integrating digital slide decks and print or .pdf packets</li> </ul> </li> </ul> </li> <li>□ Use Amplify Science@Home Videos if:           <ul style="list-style-type: none"> <li>■ Your students have consistent access to digital devices at home</li> <li>■ You have about the same amount of time for teaching science as you normally would</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• <b>amplify.com/remotel learning</b> <ul style="list-style-type: none"> <li>○ Access resources and suggestions for using Amplify programs remotely.</li> </ul> </li> <li>• <b>Program Hub</b> <ul style="list-style-type: none"> <li>○ Access Amplify Science@Home Videos and Amplify Science@Home Units</li> </ul> </li> </ul>

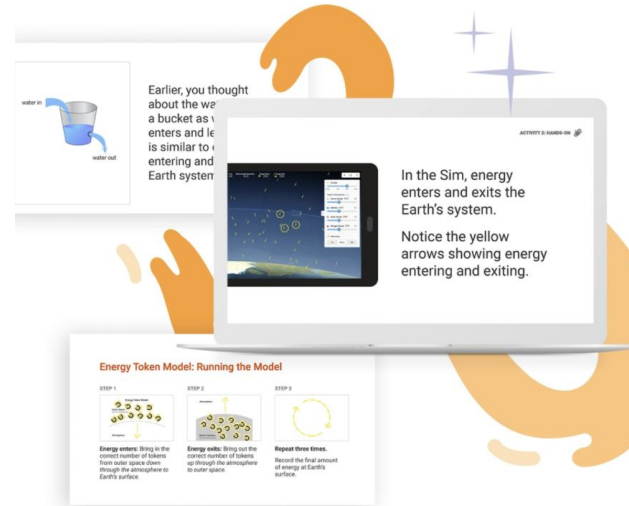

# Hybrid learning resources

# Amplify @home

[amplify.com/science-coming-soon/](https://amplify.com/science-coming-soon/)

Amplify is launching several new and exciting features for Amplify Science that will save you time, extend your reach, and support your efforts to deliver the types of rigorous and riveting learning experiences in remote and hybrid settings.

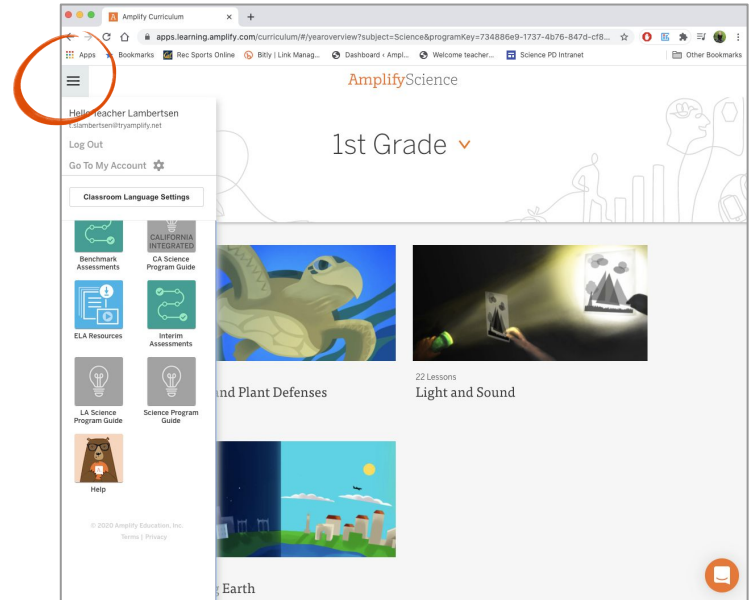

# Amplify Science Program Hub

## A new hub for Amplify Science resources

- Videos and resources to continue getting ready to teach
- Coming soon: Amplify@Home resources
- Keep checking back for updates

[science.amplify.com/programhub](https://science.amplify.com/programhub)

# Remote learning guidance: two options

## Amplify Science@Home Units

- **Condensed** Amplify Science units
- Options for a **digital** student experience (@Home Slides) or a **print-only** student experience (@Home Packets)
- Suggestions for enhancing if you have **in-person** or **synchronous time**

## Amplify Science@Home Videos

- Videos of Amplify Science lessons **adapted for remote learning**
- Taught by real **Amplify Science teachers**
- Option to **send to students** or **use as a model** to record your own videos

# Selecting remote learning resources

First, ask yourself...

- How much **time** do students have to learn science in the upcoming school year?
- Do your students have **access to technology** at home, or do you need a **print-only solution**?

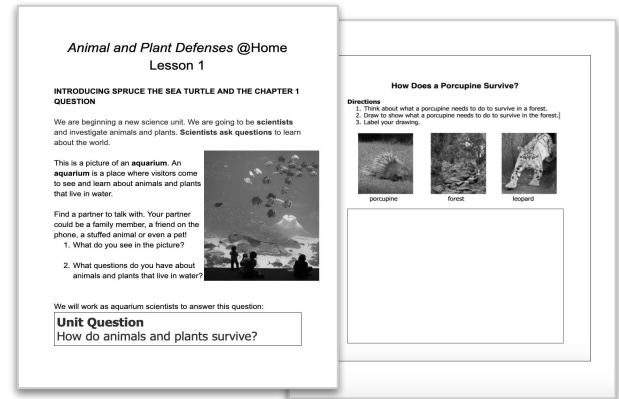

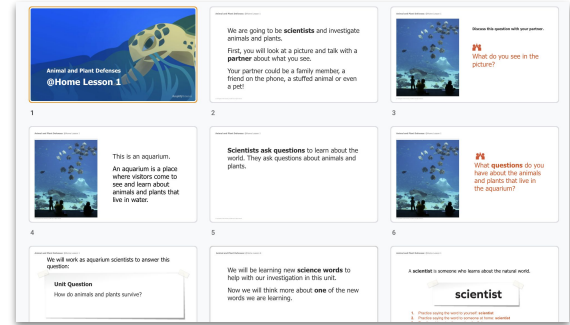

# Selecting remote learning resources

## Use Amplify Science @Home Units if

- You have **significantly less time** to teach science than you usually do.

You can choose from two different @Home Units formats, based on your students' tech access:

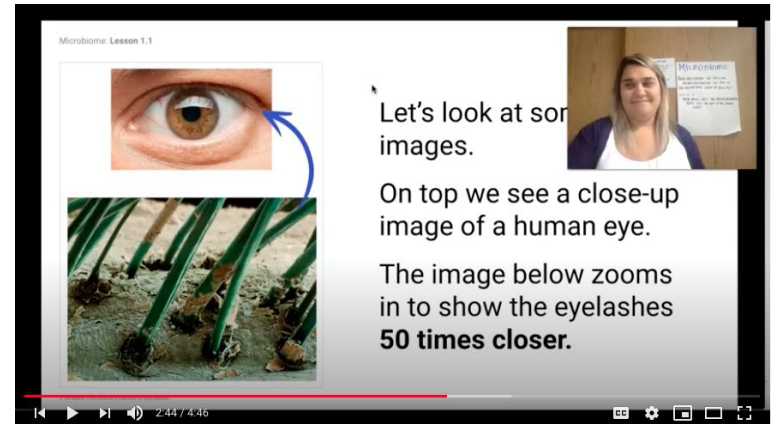

- @Home Packets:** print-only version
- @Home Slides:** digital version, integrating digital slide decks and print or .pdf packets

# Selecting remote learning resources

## Use Amplify Science@Home Videos if

- Your students have **consistent access to digital devices** at home, and
- You have about the **same amount of time** for teaching science as you normally would

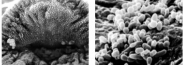

# The @Home Resources can be used in tandem.

## @Home Units (packets or slides)

Amalily Science  
Microbiome @Home Lesson 1

**INTRODUCING THE MICROBIOME RESEARCH INSTITUTE**  
Scientists at the Microbiome Research Institute need help explaining how the billions of tiny **microorganisms** on and in the human body keep us healthy.

These are microorganisms that live on and in the human body.

The head scientist at the Microbiome Research Institute is asking for help because a politician wants to stop funding research on little things like microorganisms. As **student researchers**, you need to learn more about these tiny living things on and in the human body in order to convince people that this research needs to continue.

**Optional:** Watch a video from the head scientist at [shryl.com/oxa](http://shryl.com/oxa)

We will be trying to figure out this question throughout the unit.

**Unit Question**  
How can having 100 trillion microorganisms on and in the human body keep us healthy?

Microbiome @Home Lesson 1  
© 2019 The Regents of the University of California. All rights reserved.

Microbiome  
@Home Lesson 4

Microbiome @Home Lesson 4

In Lesson 3 you read the article "The Human Microbiome" and made annotations.

**Why do you think it is important to annotate while you read science?**

**Discussing Annotations**

1. **Choose** several interesting questions, connections or ideas to share with a partner. Tag each one with **Below**.
2. **Talk about** your chosen annotations with a partner. Tag each annotation with **Discussed** if you were able to include your questions or if you discussed a connection or idea.

## @Home Videos

Microbiome: Lesson 1.1

Let's look at some images.

On top we see a close-up image of a human eye.

The image below zooms in to show the eyelashes 50 times closer.

2:44 / 4:46

# @Home Resources example use case

## Hybrid Model: remote asynchronous and live in person teaching

**Monday**  
*Remote*

Assign: @Home Lesson 1 (slides or packet)

**Tuesday**  
*In-person*

Teach: @Home Lesson 2 using guidance for in-person instruction\*

**Wednesday**  
*Remote*

Assign: @Home Lesson 3 with @Home Video clips to support

**Thursday**  
*Remote*

Assign: @Home Lesson 4 with @Home Video clips to support

**Friday**  
*In-person*

Revisit @Home Lessons 3-4 using guidance for in-person instruction\*

\*Ideas for in-person instruction includes hands-on or discourse-based activities

# @Home Resources example use case

## Remote Model: with synchronous & asynchronous learning

Days 1 & 2

*Asynchronous*

Assign: @Home Lesson 1 (slides or packets) supplemented with @Home Videos.

Day 3

*Synchronous*

Teach: @Home Lesson 2 (slides or packet) using synchronous suggestions.

Day 4

*Asynchronous*

Assign: @Home Lesson 3. Supplement with @Home Videos.

Day 5

*Synchronous*

Revisit @Home Lesson 3, using synchronous suggestions.

# Plan for the day

- **Framing the day**
  - What is Amplify Science?
- **Phenomenon-based learning**
  - What is phenomena-based instruction?
  - What does this look like in Amplify Science?
- **Supporting instruction**
  - Progress builds and assessments
- **Supporting implementation**
  - Administrator resources
  - Remote & hybrid resources
- **Closing**
  - Reflection & survey

# Revisiting our goals

Are you able to:

- Recognize how lessons engage students in three-dimensional learning?
- Understand how the program’s multimodal approach supports students in figuring out the unit phenomenon?
- Become familiar with “look fors” that administrators should see in an effective three dimensional science instruction?
- Discuss ways in which administrators can support the teaching of science in the coming school year?
- Make an informed decision about which of the Amplify Science Hybrid Learning Resources (@Home Unit and @Home Videos) will best support their teachers?

# Reflection

After today's session, what are you newly excited about with Amplify Science?

What are the new challenges that you are now anticipating?

# NYC Resources site

Amplify.

Welcome, New York City  
Department of Education

Resources for support

Welcome! This site contains supporting resources designed for the New York City Department of Education Amplify Science adoption for grades K-5.

Amplify Chat

## When contacting the customer care team:

- Identify yourself as an Amplify Science user.
- Note the unit you are teaching.
- Note the type of device you are using (Chromebook, iPad, Windows, laptop).
- Note the web browser you are using (Chrome or Safari).
- Include a screenshot of the problem, if possible.
- Copy your district or site IT contact on emails.
