Amplify Science CALIFORNIA > Plate Motion

OPEN PRINTABLE PROGRESS BUILD

Progress Build Level 1: The Earth's entire outer layer (below the water and soil that we see) is made of solid rock that is divided into plates. Earth's plates can move.

Underneath the soil, vegetation, and water that we see on the surface of Earth is the outer layer of Earth's geosphere, the solid part of our rocky planet. This outer layer of Earth is covered entirely with hard, solid rock that is divided into sections called plates. And, these plates can move.

Progress Build Level 2: The plates move on top of a soft, solid layer of rock called the mantle. At plate boundaries where the plates are moving away from each other, rock rises from the mantle and hardens, adding new solid rock to the edges of the plates. At plate boundaries where plates are moving toward each other, one plate moves underneath the other and sinks into the mantle.

Underneath the soil, vegetation, and water that we see on the surface of Earth is the outer layer of Earth's geosphere, the solid part of our rocky

Objectives

By the end of this 1-hour workshop, you will be able to...

- Elaborate on the central role academic discourse & questioning strategies play in 3-dimensional, multimodal learning.
- Adapt Amplify Science discourse routines, questioning strategies, and the classroom wall to meet the needs of all students in a remote/hybrid instructional context.

e

Plan for the day

- **Framing the day**
 - Welcome and introductions
 - Anticipatory activity
- **Amplify Science approach review**
 - 3-Dimensional learning
 - Multiple modalities
- **Amplify Science discourse routines**
 - @Home Unit lesson analysis
- **Questioning strategies**
 - Remote/hybrid adaptations
- **Classroom wall**
 - Unit, chapter, & investigation questions
 - Remote classroom wall
- **Closing**
 - Reflection & additional resources
 - Survey

Anticipatory activity

On the Jamboard “post”

- your **ideas** on how scientists and engineers use **questioning** & academic **discourse** in their work.

How do scientists and engineers use questioning & academic discourse in their work?

Idea

Idea

Idea

Multimodal, phenomenon-based learning

In each Amplify Science unit, students embody the role of a scientist or engineer to **figure out phenomena**.

They gather evidence from multiple sources, using multiple modalities.

What are PHENOMENA?

Phenomena are observable occurrences.

- These occurrences stimulate curiosity or pose problems to for students to solve.
- Students are motivated to ask science questions or design solutions that drive learning.

Amplify Science units focus on phenomena

Topics	Phenomena
all about sea turtles	How do sea turtles defend themselves from sharks?
inheritance and traits	How do organisms get their traits?
ecosystem restoration	How can an ecosystem be restored to its original healthy state?

Shifts called for in the NRC* framework

Learning about topics

Figuring out phenomena

Listing or classifying facts
devoid of context

Understanding
interrelatedness of ideas

Simple observations

Complex causal
explanations

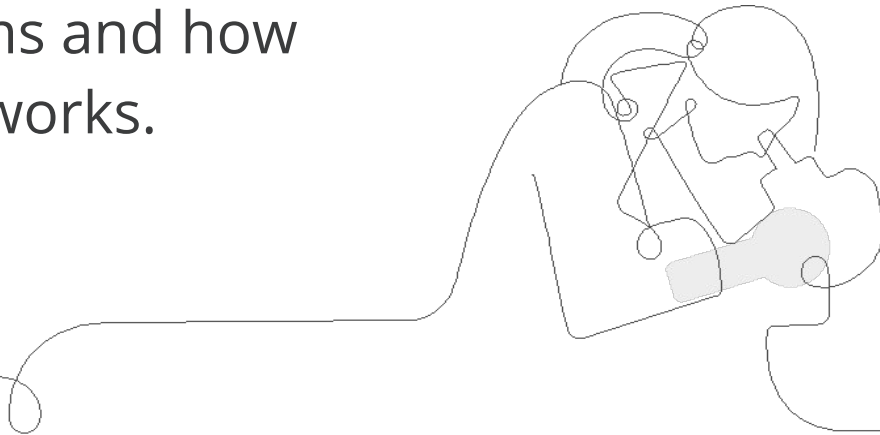

*National Research Council of the National Academy of Sciences, 2011

Figure out,
not learn about

Problem-based deep dives

Students inhabit the roles of scientists and engineers to figure out solutions to real-world problems and how the natural world works.

Three dimensions of NYSSL

Disciplinary Core Ideas

- Describe core ideas in the science discipline (DCI)

Science and Engineering Practices

- Describe behaviors scientists and engineers engage in (SEP)

Crosscutting Concepts

- Describe concepts linking the different domains of science (CCC)

Science and Engineering Practices (SEP)

How students engage as scientists

1. Asking questions (for science) and defining problems (for engineering)
2. Developing and using models
3. Planning and carrying out investigations
4. Analyzing and interpreting data
5. Using mathematics and computational thinking
6. Constructing explanations (for science) and designing solutions (for engineering)
7. Engaging in argument from evidence
8. Obtaining, evaluating, and communicating information

Amplify Science approach

**Introduce a phenomenon
and a related problem**

**Collect evidence from
multiple sources**

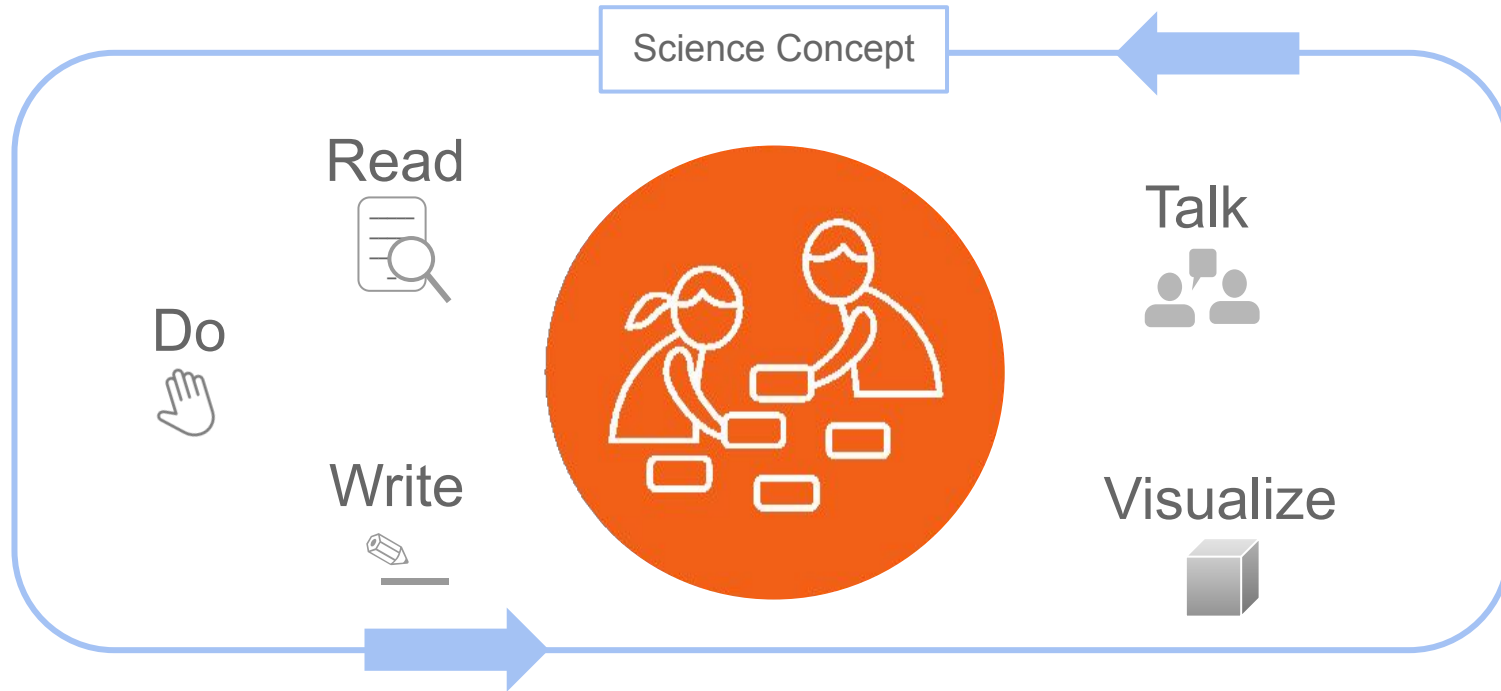

**Build increasingly
complex explanations**

**Apply knowledge
to a different context**

Multimodal learning

Gathering evidence from different sources

Questions?

Plan for the day

- **Framing the day**
 - Welcome and introductions
 - Anticipatory activity
- **Amplify Science approach review**
 - Multimodal, phenomenon-based learning
 - 3-dimensional learning

 - Unit, chapter, & investigation questions
 - Remote classroom wall
- **Closing**
 - Reflection & additional resources
 - Survey

What is academic discourse?

Academic language

- Identify...
- What is...?
- List...
- Students use tier 1 and 2 vocabulary

Academic discourse

- Prove/disprove with evidence...
- What would happen if....how do you know?
- Explain how this connects to...
- Students use tier 2 & 3 vocabulary

How can strategic teacher questions throughout the lesson promote a higher level of student academic discourse?

Bloom's Taxonomy

Amplify Science discourse routines

- Oral Composition and/or Drawings as teacher captures words (K-1)
- Explanation Language Frames
- Shared Listening
- Partner Reading
- Thought Swap
- Think-Pair-Share
- Word Relationships
- Questioning Strategies [K-8]
 - Do you agree/disagree?

	Kindergarten - Grade 1	Grades 2-5
Discourse routines	<p>Students engage in informal partner, small group, and full class talk as well as with Shared Listening, a structured discourse routine.</p> <p>To work towards answering each Chapter question, students first compose responses orally with a Language Frame activity using sentence frames written on sentence strips, completed with cards. They use this practiced sentence structure to write explanations together as a class (Shared Writing) or in their investigation notebooks.</p>	<p>Students engage in informal partner, small group, and full class talk as well as with a variety of structured discourse routines. Each unit includes 2-3 different routines such as:</p> <ul style="list-style-type: none">• Shared listening• Think-pair-share• Think-draw (or write) -pair-share• Thought swap• Concept mapping• Word relationships• Building on ideas• Evidence circles

Placeholder for @ home lesson insert: Inheritance & Traits

Reflect and share

- Choose one discourse routine and describe how you would facilitate it in your remote/hybrid classroom for this particular lesson.

Academic Discourse Routines in the Amplify Science Remote/Hybrid Classroom Collaborative Brainstorm

Explanation Language Frames - a gradual release strategy that provides students with a structure to frame their thinking. Ex: Turtles need a ___ to survive because ___.

Ideas for how to facilitate this routine in a remote/hybrid instructional context.	
Challenges & solutions for facilitating this routine in a remote/hybrid instructional context.	
Scaffolds & modifications for this routine to engage ALL students in a remote/hybrid instructional context.	

Reflect and share

- What might be one challenge with facilitating this discourse routine in your remote/hybrid classroom?
- What is a solution to this challenge?

Academic Discourse Routines in the Amplify Science Remote/Hybrid Classroom Collaborative Brainstorm

Explanation Language Frames - a gradual release strategy that provides students with a structure to frame their thinking. Ex: Turtles need a ___ to survive because ___.

Ideas for how to facilitate this routine in a remote/hybrid instructional context.	
Challenges & solutions for facilitating this routine in a remote/hybrid instructional context.	
Scaffolds & modifications for this routine to engage ALL students in a remote/hybrid instructional context.	

Reflect and share

- How could you scaffold and/or modify the discourse routine to engage all students?

Academic Discourse Routines in the Amplify Science Remote/Hybrid Classroom Collaborative Brainstorm

Explanation Language Frames - a gradual release strategy that provides students with a structure to frame their thinking. Ex: Turtles need a ___ to survive because ___.

Ideas for how to facilitate this routine in a remote/hybrid instructional context.	
Challenges & solutions for facilitating this routine in a remote/hybrid instructional context.	
Scaffolds & modifications for this routine to engage ALL students in a remote/hybrid instructional context.	

Plan for the day

 - Remote classroom wall
- **Closing**
 - Reflection & additional resources
 - Survey

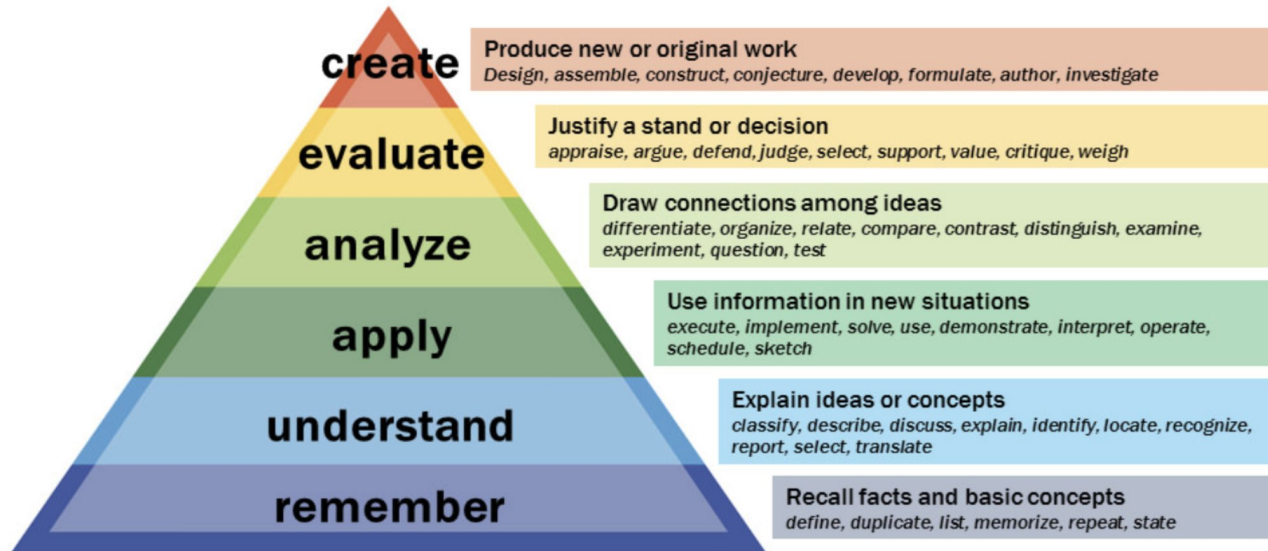

Reflect and share

- What questioning strategies have you used in your classroom in the past?
- What role(s) have these strategies taken on in your classroom in the past?

Questioning Strategies - In order to engage all learners in the classroom, ensuring everyone has the opportunity to participate in discussions and do the important thinking when a question is posed, teachers use a variety of questioning strategies along Bloom's Taxonomy. Questions are pre-planned prior to the lesson and specifically aligned to the learning objectives and differentiated student needs.

Bloom's Taxonomy

To make connections within a unit of study, ask students to:

- **Remember:** What are we figuring out in this unit? What do you already know?
- **Understand:** Describe how this lesson activity is connected to the unit/chapter/investigation question?
- **Apply:** Use the unit vocabulary to enhance your scientific explanation.
- **Analyze:** What information can you use from the Simulation to support your explanation or argument? Describe how the ideas / concepts fit together?
- **Evaluate:** Defend your claim with at least two sources of evidence. Critique the argument of a peer and provide feedback on their supporting evidence.
- **Create:** Design a model to support the solution.

Questioning in Amplify Science

- clarify understanding
- justify claims
- verify evidence
- accessing prior knowledge
- uncovering misconceptions

Analyzing Questioning Strategies in Amplify

Use the graphic organizer to collect your thoughts.

- Identify questions within @home lesson of choice.
- What purpose did the questions serve?
- How did the questions further student understanding?
- How did they serve as a check for understanding?
- How did they align to the unit phenomenon?
- What modifications would you make to questioning to address the needs of the different learners in a remote/hybrid context?

Identify questions within the activity.	
What purpose did the questions serve?	
How did the questions further student understanding?	
How did they serve as a check for understanding?	
How did they align to the unit phenomenon?	
Thinking about your students, what modifications would you make to questioning to address their needs?	

Plan for the day

Inheritance and Traits: Variation in Wolves

Problem students work to solve

What is the origin of the traits of Wolf 44—a wolf that appears different from the rest of its pack?

Chapter 1 Question

Why are wolves different even though they are all the same species? (introduced in 1.4)

Investigation Questions

Evidence sources and reflection opportunities

What is the relationship among unit, chapter, and investigation questions?

How do they facilitate students' thinking like a scientist and/or engineer?

Key concepts

Application of key concepts to problem

- Review wolf data and reflect on variation of traits within the wolf pack (1.7)
- Write class explanation to answer the Chapter 1 Question (1.7)

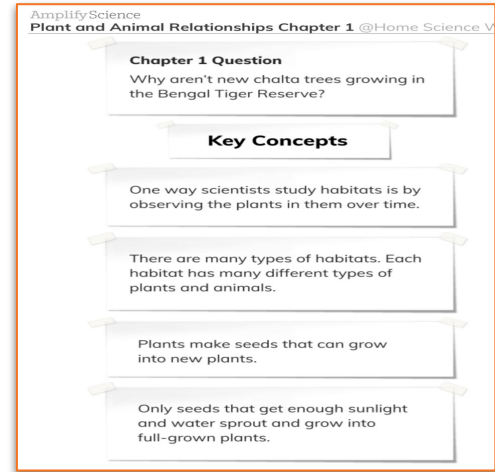

Explanation that students can make to answer the Chapter 1 Question

Even though all wolves are the same species, some wolves are different from others due to variation of traits within a species. This means that even though wolves can have similarities in their traits, there can also be variations in each trait. For example, wolves have different colors of fur: some wolves have a trait for gray fur, others have a trait for black fur.

Classroom wall

Re-imagined as @Home science wall

- **Chapter Questions, key concepts,** and **vocabulary** that have been introduced so far are provided in the **last lesson** of each chapter.
- How would you enhance students' experience of the **Classroom wall** in a **remote/hybrid** setting?

@Home science wall

To enhance students' experience of the @Home Science Wall, you could have them:

- Draw a **picture** or write their ideas on their @Home Science Wall pages.
- Highlight or **color** in each question, key concept, or word that is introduced.
- **Cut out** each question, key concept, or word. These can be then posted on a wall, large sheet of paper, or refrigerator at home.
- **Illustrate** each word that is introduced to create a picture glossary.
- If you are meeting with your class remotely, you could create a **virtual @Home Science Wall**.

Creating a virtual @Home science wall

If meeting remotely

- **Screenshot** chapter questions, key concepts, vocabulary from **@Home Student sheets**
- Screenshot (from **teacher's guide**) or create own **unit & investigation** questions
- **Animate** new additions
- Now **try** yourself on **Google slides!**

Unit Question	<u>Inheritance & Traits</u>	Vocabulary
Unit Question How do organisms get their traits?	Key Concepts Organisms have observable traits. Organisms in a species have many similar traits, but for each trait there can be variation. Scientists ask questions they can investigate by making observations. Organisms can have traits that are similar to their parents' traits.	 investigate  organism
Chapter 1 Question Why are wolves different even though they are all the same species?	Scientists ask questions they can investigate by making observations. Organisms can have traits that are similar to their parents' traits.	 trait  pattern
Chapter 2 Question Why is Wolf 44's color similar to one pack but different from the other?	Offspring inherit instructions for each trait from both their parents. Offspring can inherit different instructions from their parents, so offspring may have different traits. Some traits result from the environment.	 observe  species
Investigation Questions <i>What are some ways that organisms can be similar or different? (1.1, 1.2, 1.3, 1.4)</i> <i>How can we describe the traits of organisms in a species? (1.5, 1.6)</i>	 variation	

Unit Question

Unit Question

How do organisms get their traits?

Chapter 1 Question

Why are wolves different even though they are all the same species?

Chapter 2 Question

Why is Wolf 44's color similar to one pack but different from the other?

Investigation Questions

What are some ways that organisms can be similar or different? (1.1, 1.2, 1.3, 1.4)

How can we describe the traits of organisms in a species? (1.5, 1.6)

Inheritance & Traits

Key Concepts

Organisms have observable traits.

Organisms in a species have many similar traits, but for each trait there can be variation.

Scientists ask questions they can investigate by making observations.

Organisms can have traits that are similar to their parents' traits.

Offspring inherit instructions for each trait from both their parents.

Offspring can inherit different instructions from their parents, so offspring may have different traits.

Some traits result from the environment.

Vocabulary

investigate

organism

trait

variation

Revisiting our objectives

Do you feel ready to to...

- Elaborate on the central role academic discourse & questioning strategies play in 3-dimensional, multimodal learning.
- Adapt Amplify Science discourse routines, questioning strategies, and the classroom wall to meet the needs of all students in a remote/hybrid instructional context.

1- I'm not sure how I'm going to do this!

3- I have some good ideas but still have some questions.

5- I have a solid plan for how to make this work!
