Amplify Science CALIFORNIA > Plate Motion

OPEN PRINTABLE PROGRESS BUILD

Progress Build Level 1: The Earth's entire outer layer (below the water and soil that we see) is made of solid rock that is divided into plates. Earth's plates can move.

Underneath the soil, vegetation, and water that we see on the surface of Earth is the outer layer of Earth's geosphere, the solid part of our rocky planet. This outer layer of Earth is covered entirely with hard, solid rock that is divided into sections called plates. And, these plates can move.

Progress Build Level 2: The plates move on top of a soft, solid layer of rock called the mantle. At plate boundaries where the plates are moving away from each other, rock rises from the mantle and hardens, adding new solid rock to the edges of the plates. At plate boundaries where plates are moving toward each other, one plate moves underneath the other and sinks into the mantle.

Underneath the soil, vegetation, and water that we see on the surface of Earth is the outer layer of Earth's geosphere, the solid part of our rocky

Overarching goals

By the end of this 1-hour workshop, you will be able to:

- Identify the embedded supports for diverse learner needs within your third unit.
- Understand the research-based principles that guided the creation of these supports & strategies in Amplify Science.

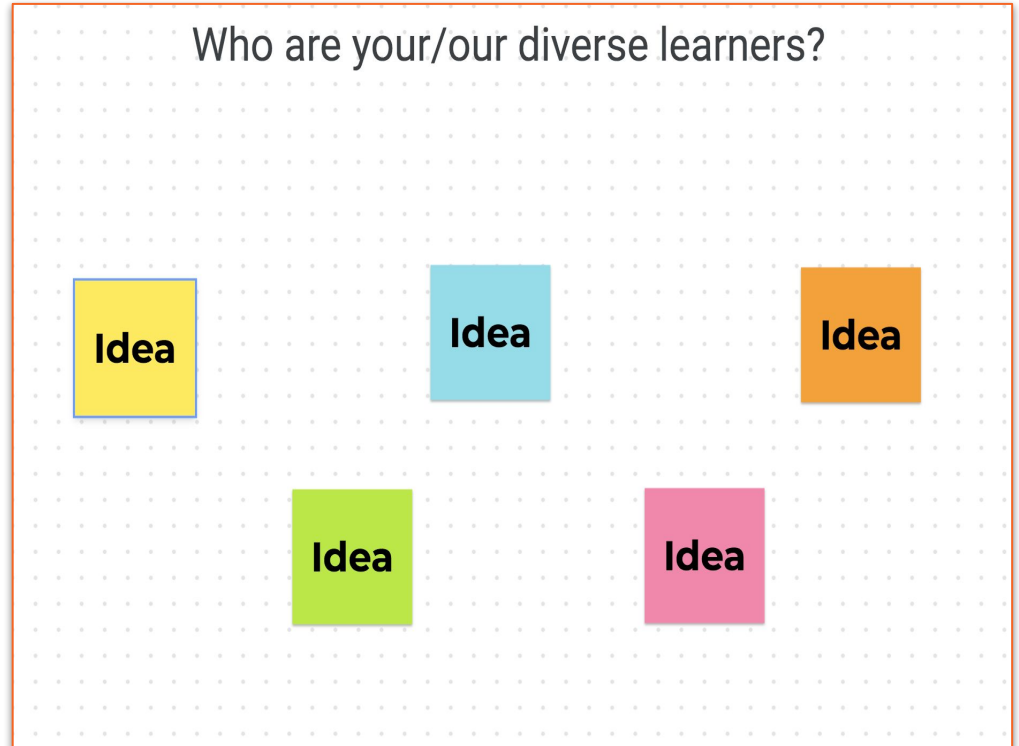

Plan for the day

- **Framing the day**
 - Welcome and introductions
 - Anticipatory activity
- Embedded supports for diverse learners
 - Research-based principles
- Analyzing an instructional sequence
 - Diverse learner profiles
 - Disciplinary literacy in science
- Multimodal instruction @home
- Closing
 - Reflection & additional resources
 - Survey

Anticipatory activity

On the Jamboard “post”

- Your thoughts on this prompt: “Who are your/our **diverse learners**?”

Who are our Diverse Learners?

“Diverse learning is not based on race or dependent on a deficit model. Students who are considered gifted are also diverse learners. All students are diverse and unique, in their own right. Let’s agree that diverse learning recognizes that all students have unique learning needs and we educators must be prepared to provide multiple entry points for all learners to access the rigor of the goals and standards.”

Anonymous Educator

The Amplify Science curriculum was developed with supporting diverse learning needs in mind.

Two overarching conceptual frameworks informed Amplify Science's approach to ensuring access and equity for all students:

Universal Design for Learning & Culturally Linguistically Responsive Teaching.

Universal Design for Learning

Universal Design for Learning (UDL) is a **research-based framework** for improving student learning experiences and outcomes by **focusing on careful instructional planning to meet the varied needs of students**. UDL is **NOT a special-education initiative**. Through the UDL framework, the **needs of ALL learners are considered** and planned for at the point of first teaching, thereby **reducing the need to reteach concepts**.

Universal Design for Learning Guidelines

I. Provide Multiple Means Representation

1: Provide options for perception

- 1.1 Offer ways of customizing the display of information
- 1.2 Offer alternatives for auditory information
- 1.3 Offer alternatives for visual information

2: Provide options for language, mathematical expressions, and symbols

- 2.1 Clarify vocabulary and symbols
- 2.2 Clarify syntax and structure
- 2.3 Support decoding of text, mathematical expressions, and symbols
- 2.4 Promote understanding across languages and symbols
- 2.5 Illustrate through multiple media

3: Provide options for comprehension

- 3.1 Activate or supply background knowledge
- 3.2 Highlight patterns, critical features, big ideas, and relationships
- 3.3 Guide information processing, visualization, and manipulation
- 3.4 Maximize transfer and generalization

<http://www.cast.org/>

4: Provide options for physical action

- 4.1 Vary the methods for response and navigation
- 4.2 Optimize access to tools and assistive technologies

5: Provide options for expression and communication

6: Provide options for executive functions

- 6.1 Guide appropriate goal-setting
- 6.2 Support planning and strategy development
- 6.3 Facilitate managing information and resources
- 6.4 Enhance capacity for monitoring progress

Provide Multiple Means of Engagement

7: Provide options for recruiting interest

- 7.1 Optimize individual choice and autonomy
- 7.2 Optimize relevance, value, and authenticity
- 7.3 Minimize threats and distractions

8: Provide options for sustaining effort and persistence

- 8.1 Optimize challenge and experience of goals and objectives
- 8.2 Optimize resources to optimize challenge
- 8.3 Promote collaboration and community
- 8.4 Provide timely, specific, and mastery-oriented feedback

9: Provide options for self-regulation

- 9.1 Promote expectations and beliefs that optimize motivation
- 9.2 Facilitate personal coping skills and strategies
- 9.3 Develop self-assessment and reflection

Virtual round robin: Give an instructional strategy from each category that you've used in your classroom.

Resourceful, knowledgeable learners

Strategic, goal-directed learners

Purposeful, motivated learners

Culturally and linguistically responsive teaching

Culturally and linguistically responsive teaching (CLRT) principles **emphasize validating and valuing students' cultural and linguistic heritage** and **creating positive and nurturing learning environments** so that learning is more effective.

Source: (l): Aaron Yaazie; (um): Kyle Spradley/ University of Missouri; (lm) Dr. Grace O'Connell; (ur) Jane Rigby; (lr) Tina Shelton/ John A. Burns/ University of Hawaii at Manoa

Culturally and linguistically responsive teaching

Think, type, chat: What have you leveraged from the Amplify curriculum to support culturally and linguistically responsive teaching?

CULTURALLY AND LINGUISTICALLY RESPONSIVE TEACHING PRINCIPLES

- ∨ Promote a positive disposition toward diversity: +
- ∨ Leverage students' cultural and experiential backgrounds: +
- ∨ Value language diversity and multilingualism: +
- ∨ Cultivate students' development of the language of science: +

Sample student profiles

Learner A: Enjoys science and math. Loves to tell stories about her many travels and enjoys figuring out phenomena presented. While she finds verbal explanations to be sufficient, she does not find it necessary to elaborate on her ideas through written explanation or written argument. She often shuts down when pushed to provide supporting details in writing.

Learner B: Enjoys reading and writing. When provided a written assignment, he is anxious to provide lengthy written and verbal explanations. Although, this learner enjoys reading, writing and speaking he is challenged by sentence structure, spelling and staying on topic.

Learner C: This new student enjoys expressing himself through art and drawings. He is not a strong reader, yet, as English is his second language. This student has strong comprehension skills and has adapted to using the classroom artifacts to help him construct written explanations.

Learner D: Enjoys solving critical thinking problems and has rich science vocabulary. She works best when provided independent tasks and does not work well in collaborative group settings. She relies on step by step teacher validation and is not likely to complete a task without making sure her answer affirmed by an adult in the room.

Changing Landforms

Why is the edge of the ocean cliff closer to the flagpole than it used to be?

The director of the Oceanside Recreation Center got a scare when a nearby cliff collapsed, and he is worried that erosion on the recreation center's ocean cliff might have safety implications for the center's visitors. By taking on the role of geologists investigating landforms and erosion, students are able to advise the director on the prudence of keeping the center open, even though its cliff is also changing.

As you experience model activity:

- Choose a **learner profile**.
- Reflect on what this student may be **challenged by**.

Keeping Diverse Learner Needs in Mind Reflection Tool

Take a Moment: How will this activity influence your planning practices?

Activity 3

Partner Reading

Today we'll read this book to learn more about **landforms**.

This will help us as we **investigate** the cliff landform near the recreation center.

Chapter 1 Question

How did the edge of the cliff get to be so close to the flagpole?

Partner Reading Guidelines

1. Sit next to your partner and place the book between you.
2. Take turns reading.
3. Read in a quiet voice.
4. Be respectful and polite to your partner.
5. Ask your partner for help if you need it. Work together to make sure you both understand what you read.

Turn to page 3 in *Landform Postcards*. Let's review the Contents.

Are any of these
landforms familiar?

Have you visited or seen
pictures of any of them?

About Landforms

Hi, my name is Annie. This book is about a road trip I took this summer. We drove across the United States. My grandpa is a **geologist**. He taught me about **landforms**. Landforms are parts of Earth's **surface** like mountains, valleys, and cliffs. Grandpa thought it would be fun for me to **observe** landforms around the country. I sent him postcards of what I saw.

Here are some things Grandpa taught me about landforms: Anywhere you go on Earth, you will see landforms. Unless you are reading this book in the middle of the ocean, you can probably find a landform near you. Even in a city, you can find landforms.

Here we are about to leave on our trip. That's me in the middle and my little sister on the right.

Grandpa also taught me that landforms are made of rock. They can have other things on top, like sand, dirt, or even ice. Some landforms may be common where you live. Others may only be found far away. Keep reading to find out what landforms I saw on my trip!

This picture has lots of different landforms. It has a beach, an island, a peninsula, and some hills.

This is the route we took around the country.

This picture has lots of different landforms. It has a beach, an island, a peninsula, and some hills.

4

Annie's grandpa thinks it would be fun for her to observe landforms.

What do you think it means to **observe something?**

Plains

Dear Grandpa,

Pretty soon after we left the city, everything looked different. The land was flat all around us for miles. Some people might think it was boring, but not me! I knew that even the flat plain is a landform. I remembered that landforms are made of rock. I pictured rock under the grass. That was neat to think about.

Love, Annie

Grandpa

Take a Moment: How will this activity influence your planning practices?

A disciplinary literacy approach to learning science

In the Amplify Science program, students **learn to read, write, and speak as scientists do** as they acquire facility with the **academic language** and vocabulary of science. Through the **seamless integration of science and literacy instruction**, students also learn that reading, writing, and talking are **essential practices of science**, and that all scientists use these practices to gather information, communicate claims, leverage evidence, draw conclusions from data, and share their ideas through oral and written **explanations and arguments**.

Reflection part 2:

How did language & literacy help students in developing scientific understanding in the model activity?

Revisiting our objectives

Do you feel ready to...

- Identify the embedded supports for diverse learner needs within your third unit.
- Understand the research-based principles that guided the creation of these supports & strategies in Amplify Science.

1- I'm not sure how I'm going to do this!

3- I have some good ideas but still have some questions.

5- I have a solid plan for how to make this work!
