

# Realize the Power of Data Coaching

Too often, educators feel inundated with data without a sense of how to use it effectively to inform their practice and improve student performance. Amplify's data coaching provides ongoing support and continuous guidance and practice for educators while empowering them to use data to change their teaching practices and impact student achievement.

## Amplify's Data Coaching: Proven Results

Amplify has provided core curriculum, intervention resources, digital assessments, and high-impact coaching and professional development to support data-driven instruction among K-12 educators for nearly two decades.

Amplify's Taking Action with Data™ (TADA) framework and data coaching services have made a difference for educators in Mississippi, Delaware, Colorado, North Carolina, Rhode Island, and Indiana, resulting in positive changes in classroom practice and gains in student achievement.

**Amplify's data coaches have deep experience in education.**

All are former teachers and experienced former instructional leaders, school administrators, and/or district leaders with decades of expertise in instruction and leading change at the school and systems level.

As a result of our work in Mississippi, high school graduation rates have increased by 12.4% in high schools where we have implemented our data coaching program.

## Four-Year Graduation Rates

2014-15

69%

2016-17

81.7%

▲ 12.4% Increase

## What Is the Taking Action with Data™ Methodology?

Under the TADA framework, Amplify data coaches provide support in effectively using data to inform instruction. Coaches work with educators to:

- Develop technical skills to interpret school-wide, teacher-level, and student-level data
- Establish and/or support a data-driven culture, routines, and PLCs across a school
- Foster greater collaboration, reflection, and investment in school-wide goals

## Data Coaching Packages for Schools Include:

Ten months of individualized, in-person coaching sessions geared toward teachers and/or school leaders based on the needs of the school. While Amplify currently provides a majority of its coaching services to elementary schools, we have experience with and can offer services in elementary, middle, and high schools.

### Schoolwide Coaching Sessions

	Teacher and Leader Coaching	Leadership Coaching
<b>Before the start of the school year</b>	<ul style="list-style-type: none"><li>• Extensive beginning of year data dive</li><li>• Align on classroom and student goals based on schoolwide goals and priorities</li></ul>	<ul style="list-style-type: none"><li>• Extensive beginning of year data dive</li><li>• Establish a vision for a data-driven culture and schoolwide routines</li><li>• Align on schoolwide goals based on district and state goals and priorities</li></ul>
