

**Do Now:** *In the chat, share something new you've learned over the last year.*

# Amplify Science CALIFORNIA

## *Wondering About Noises in Trees* Orientation Session

TK, Unit 1

LAUSD

x/x/2021

Presented by Your Name

# Workshop goals

By the end of this workshop, teachers will be able to:

- Articulate the Amplify Science Approach including multimodal learning
- Describe the storyline of the unit
- Identify how the progression of lessons/activities build upon one another to help students build increasingly complex understandings
- Utilize the flexible implementation structures to plan for the first unit

# Remote Professional Learning Orientation and Norms

Take some time to orient yourself to the platform

- *“where’s the chat box? what are these squares at the top of my screen?, where’s the mute button?”*

Mute your microphone to reduce background noise unless sharing with the group

The chat box is available for posting questions or responses to during the training

Make sure you have a note-catcher present

Engage at your comfort level - chat, ask questions, discuss, share!

# Capturing key takeaways!

[illegible]

## Amplify.

# Next Generation Science Standards (NGSS)

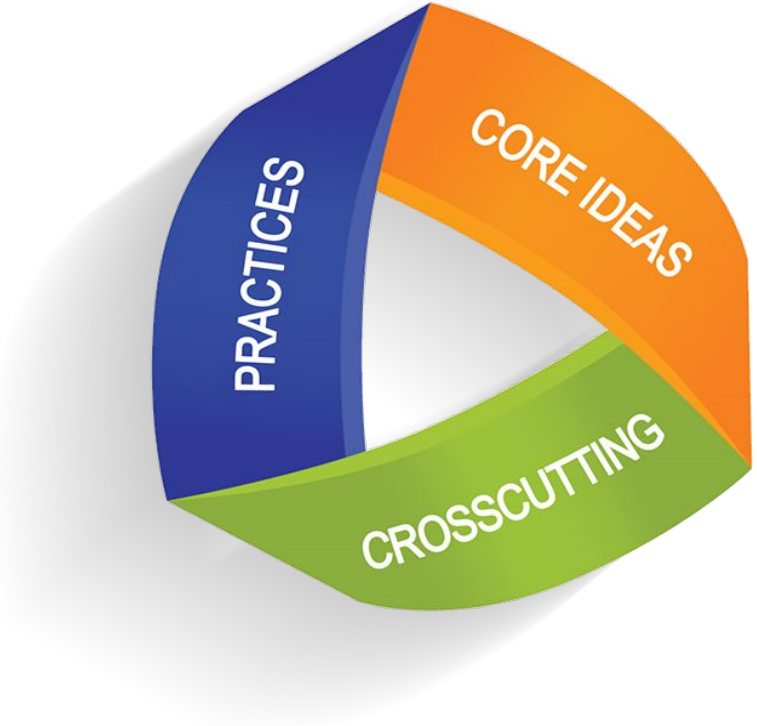

Standards as three-dimensional performance expectations that integrate **disciplinary core ideas**, **science and engineering practices**, and **crosscutting concepts**

# 3-Dimensional Approach

What **disciplinary core idea** do I want students to figure out?

What **science and engineering practice** will they use to figure it out?

What **crosscutting concept** will help them connect what they learn to other ideas in science?

# The TK Connection

## Amplify Science TK

Students investigate a phenomena (What is making noises in trees?)

## CA Preschool Learning Foundations

Phenomena driven learning

## CA NGSS

Centered around events in the natural or constructed world (phenomena)

Students build increasingly complex explanations of the phenomena over the course of the unit through science, language development, literacy, math, movement, etc.

Coherent instruction across the curriculum

NGSS instruction aligned K-8

Students work to “solve a mystery” about trees (something familiar to kids)

Learning relevant to students interest and community needs

Stress on human relationships with the natural world

# Amplify Science TK Units

## Precursor to the NGSS

### DCI's

- Scientific Inquiry
- Physical Science
- Earth Science
- Life Science

### SEP's

- Wondering
- Comparing and Looking for Patterns
- Describing what happened
- Collecting Evidence
- Talking, writing and drawing about what we know, read and learn about new discoveries

### CCC's

- Patterns
- Cause and Effect

THE LAWRENCE  
HALL OF SCIENCE  
UNIVERSITY OF CALIFORNIA, BERKELEY

+ Amplify.

---

Amplify Science

Amplify engages students in the  
**1st person perspective** of  
investigating, designing, modeling  
and problem solving.

# Amplify Science Transitional Kindergarten

## Course Structure

**Life Science:**  
Wondering About  
Trees

**Physical Science:**  
Wondering About  
Buildings

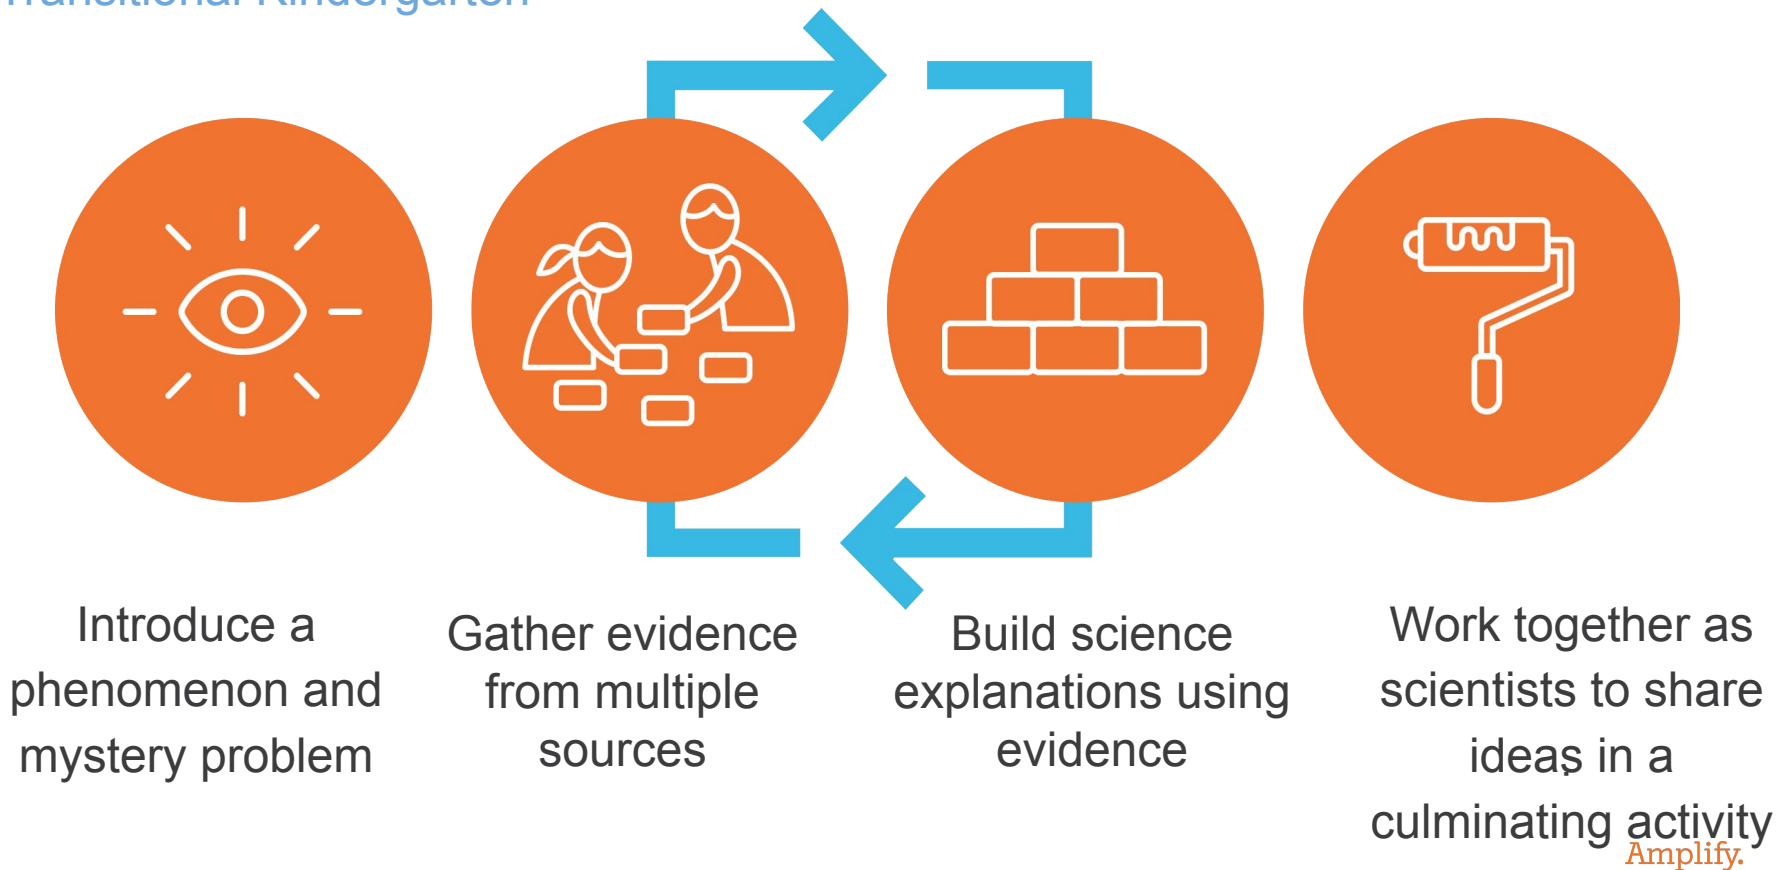

**Earth Science:**  
Wondering About  
Puddles

**Number of Lessons:** 20 lessons per unit  
**Time:** 15 mins per lessons  
**Instructional Time:** 4 - 6 weeks per unit

# Amplify Science Instructional Approach

Transitional Kindergarten

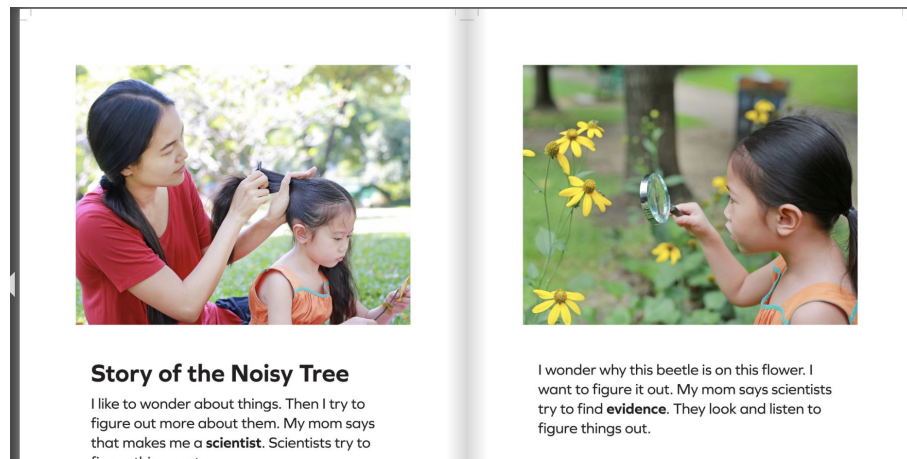

## Life Science: Wondering About Noises in Trees

### Unit Structure:

How will students figure out / solve the mystery?

# Unit Resources = Teacher's Guide, Big Book, Print Materials

**Science Question 1:**  
Why are so many noises coming from the tree?

# Thought swap

How do you currently teach science in your classroom?  
(place in the chat)

# Thought swap

What are the challenges in teaching science in TK?

A couple volunteers to speak  
(also feel free to add to the chat)

# Thought swap

What are you looking forward to with a new TK curriculum?

A couple volunteers to speak  
(also feel free to add to the chat)

As you watch this video, listen carefully to how you know Emma is engaged in phenomena based learning?

What words or phrases does she repeat to let you know?

Use the chat feature to share your thoughts.

**Kevin Butters**  
@chickensrevenge

Follow

My daughter is having awesome conversations with me about what she is learning in science! @AmplifyScience #RiseGI #LincolnShines

**Parent:** “Emma, what are you learning about in Science?”

**Emma:** “All plants need water. Sometimes it rains in the desert. And we’re figuring out why does the black one doesn’t grow and the pink one and the white one does grow.”

**Parent:** “But you don’t...”

**Emma:** “And we ummm we figured out the one who had the ummm caterpillars. We already figured that one out cause no caterpillars were there. OK? The End!”

# Figure out, not learn about

Amplify Science offers students the opportunity to engage in

## **Problem-based deep dives**

Students inhabit the role of scientists and engineers to explain or predict phenomena.

They use what they figure out to solve real-world problems.

**DRAMATIC PLAY** will never be the same.

We are now officially: **Scientists!**

# Amplify Science: Unit focus on phenomena

| Topics                 |   | Phenomena   |
|------------------------|---|---|
| all about sea turtles  | ➔ | How do sea turtles defend themselves from sharks?   |
| inheritance and traits | ➔ | How do organisms get their traits?  |
| ecosystem restoration  | ➔ | How can an ecosystem be restored to its original healthy state?                             |
| all about butterflies  | ➔ | Why are there no more Monarch butterfly caterpillars since the field changed into a garden? |

# Plan for the day

- Framing the day

# Understanding an exploration

The purpose of this section is for you to:

- Understand what and how students learn across an exploration in Amplify Science.
- Explore key learning activities in your first unit of instruction.
- Understand the approach to a conceptual build of science knowledge

# How are the TK Units Structured?

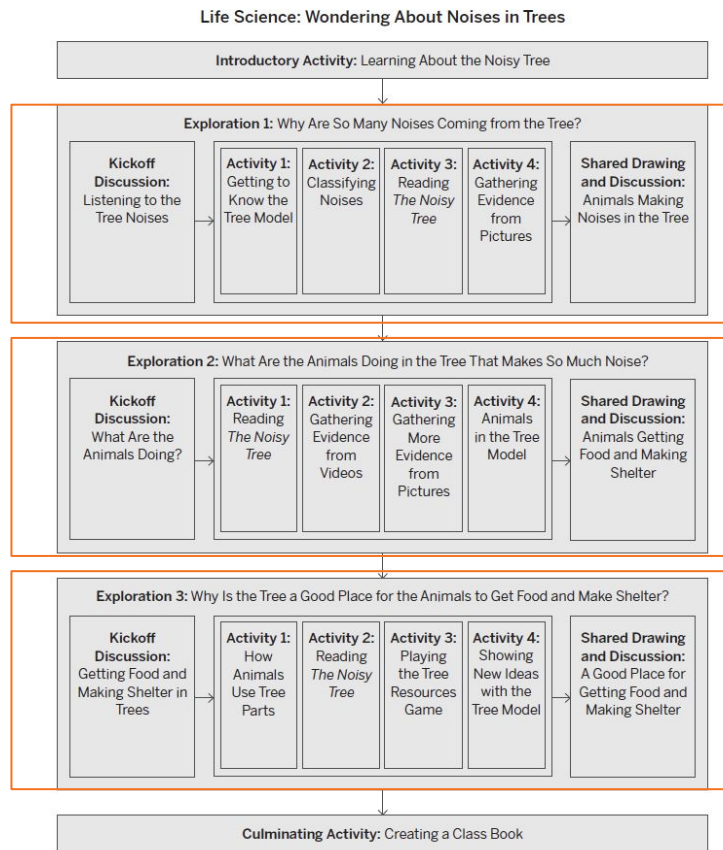

## Life Science: Wondering About Noises in Trees

# Wondering about Noises in Trees

Analyze the unit structure document.  
Looking at the Title of each Exploration...

- What do you anticipate students will know and be able to do at the end of each Exploration?
- How do the Exploration Activities support this learning?

# TK: Wondering About Noises in Trees: Introductory Activity

# Read Aloud: The Noisy Tree

- **Phenomenon:** noises coming from trees
- **Mystery students solve:** what causes these noises and why.
- **Role:** scientists

# Shared Listening

1.

**Partner A** shares.  
**Partner B** listens.

2.

**Partner B** repeats.  
*I heard you say...*

3.

**Partners** switch.

# Let's Chat...

What preconceptions or misconceptions could students have about what is making the noises they hear in trees?

# Extension Opportunity

## Teacher Support

### Instructional Suggestion

#### **Providing More Experience: Class Nature Walk**

You can extend the Introductory Activity by taking a class nature walk if you have access to a natural or semi-natural area with trees. This area can be a part of the schoolyard, a small local park, or a larger protected area. Let students know that they will look and listen to figure out more about what is in, on, and around the trees. Guide students on a walk, pausing frequently to model looking and listening closely to the trees. For example, you can say, “I look closely at this tree, and I see leaves.” “I look closely at these leaves, and I see that they have lines on them.” “I listen closely to this tree, and I hear chirping.” During the class nature walk, invite students to share any observations they make.

### Instructional Suggestion

#### **Providing More Experience: Home Connection**

The Introductory Activity includes an optional Home Connection that introduces families to one of the science practices students will learn in this unit. Home Connections can encourage interaction and discussion between students and their families around science concepts, which is beneficial for student learning. The Home Connection: Observing Trees invites students and an adult to observe sights and sounds near a tree or several trees. Make one copy of the Home Connection: Observing Trees copymaster for each student to take home.

# Exploration One: Kickoff Discussion

**Science Question #1:** Why are so many noises coming from the tree?

## **Activities:**

- Revisit The Noisy Tree
- Listening to noises
- Shared Listening Routine

## Sound #1: Tap-Tap-Tapping

## Sound #2: Crunching noise

# Shared Listening

1.

**Partner A** shares.  
**Partner B** listens.

2.

**Partner B** repeats.  
*I heard you say...*

3.

**Partners** switch.

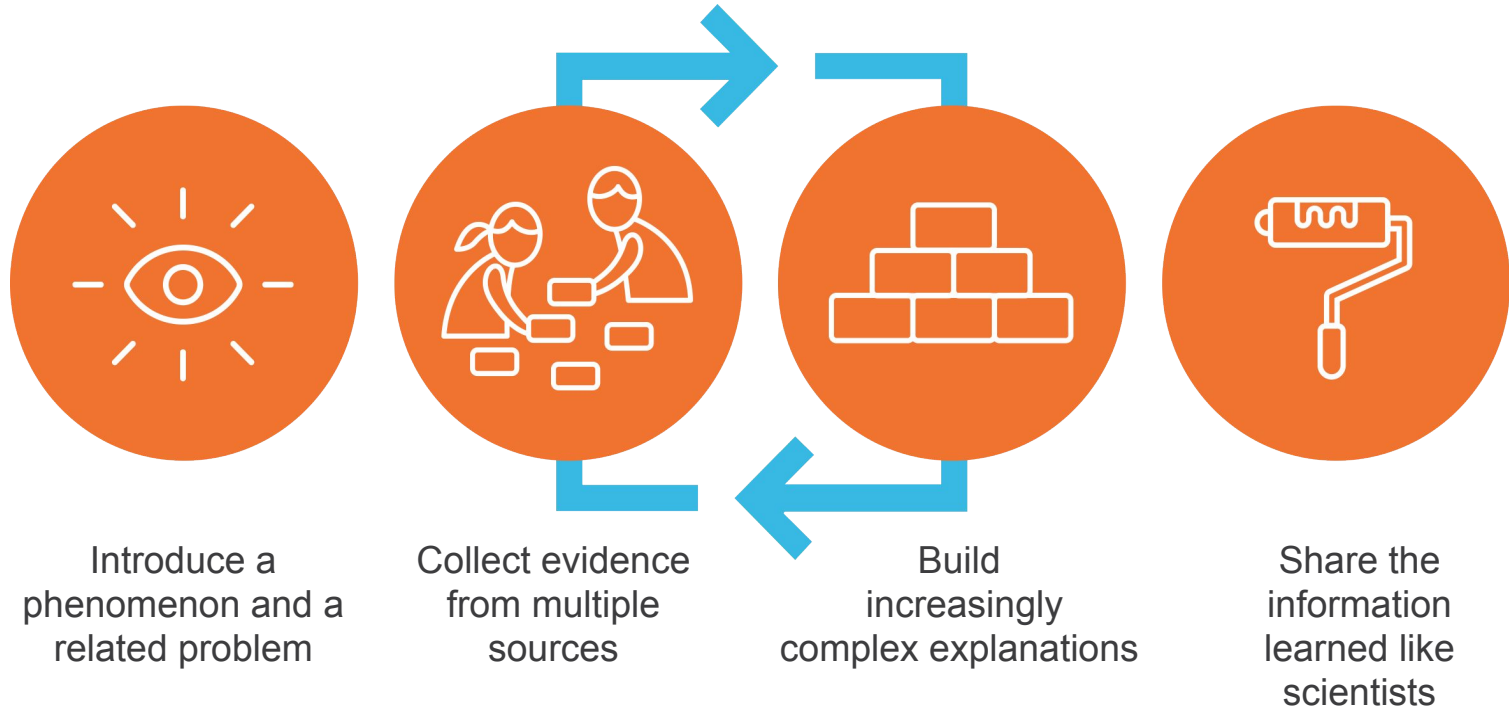

# Let's Chat..

- How can you integrate & personalize the Instructional Routines to your own classroom layout & organizational structure?

# Describe the Amplify Science Instructional Approach.

# Plan for the day

- Framing the day
- Understanding an exploration
- Exploration and activity progressions
- Preparing to implement
- Closing

| Notes         | The Amplify Approach          |
|---------------|-------------------------------|
|               |                               |
| Exploration 1 | Implementation Considerations |

# Coherence

from knowing a  
list of ideas  to knowing how  
ideas fit together

# TK: Wondering About Noises in Trees: Review

# Framing Activity

What do you hear? What do you picture?

As you listen to the noises  
write what you think it is and  
what makes you think that

# Animals in Trees

What do you hear? What do you picture?

## Let's Chat:

What prior knowledge did you bring that helped you make the conclusions about the noises you heard?

# Exploration One: Activity Stations

How would you introduce these activities in your classroom?

## Activity One:

Observe the tree model and think about how the students would make the different types of leaves and add them to the model. Discuss how the model is similar and different to a real tree.

## Activity Two:

Listen to different noises and make drawings of ideas about what made each noise. Look for patterns in the data you've recorded

## Activity Three:

Read the next section of The Noisy Tree in which the girl makes new observations of the tree in the park.

## Activity Four:

Observe pictures of trees and notice there are animals in many of the trees. Use the language frame to describe your observations.

## Activity One: Tree Model

## Activity Two: Recordings of Noises

## Activity Three: The Noisy Tree

### The Noisy Tree

by Ashley Chase

## Activity Four: Tree Cards

# Work Time: Unpacking Exploration One

Resource to use:

- Exploration 1 PDF

## Assignments

- Activity 1
- Activity 2
- Activity 3
- Activity 4

Questions to answer:

- How will this activity help students develop an understanding of the new key concepts?
- How will this activity help students answer the science question?
- How could you structure this activity in your classroom?

# Share Out

- Give a synopsis of the activity the students do and what they learn.
- What are some notes you made about this activity to support your students?

# Closing Activity

There is a \_\_\_\_\_ in the tree.

|                                  |                                       |                                   |                                       |
|----------------------------------|---------------------------------------|-----------------------------------|---------------------------------------|
| <input type="checkbox"/><br>owl  | <input type="checkbox"/><br>raccoon   | <input type="checkbox"/><br>bear  | <input type="checkbox"/><br>koala     |
| <input type="checkbox"/><br>wasp | <input type="checkbox"/><br>butterfly | <input type="checkbox"/><br>gecko |                                       |
| <input type="checkbox"/><br>bat  | <input type="checkbox"/><br>monkey    | <input type="checkbox"/><br>bird  | <input type="checkbox"/><br>porcupine |

# Let's Chat

What are some ways you could structure the activities in your classroom?

# Exploration Two

Students gather evidence about different kinds of things that animals do in trees.

# Exploration Three

Students gather evidence about why trees are good places for animals to get food and make shelter.

# Shared Writing and Drawing

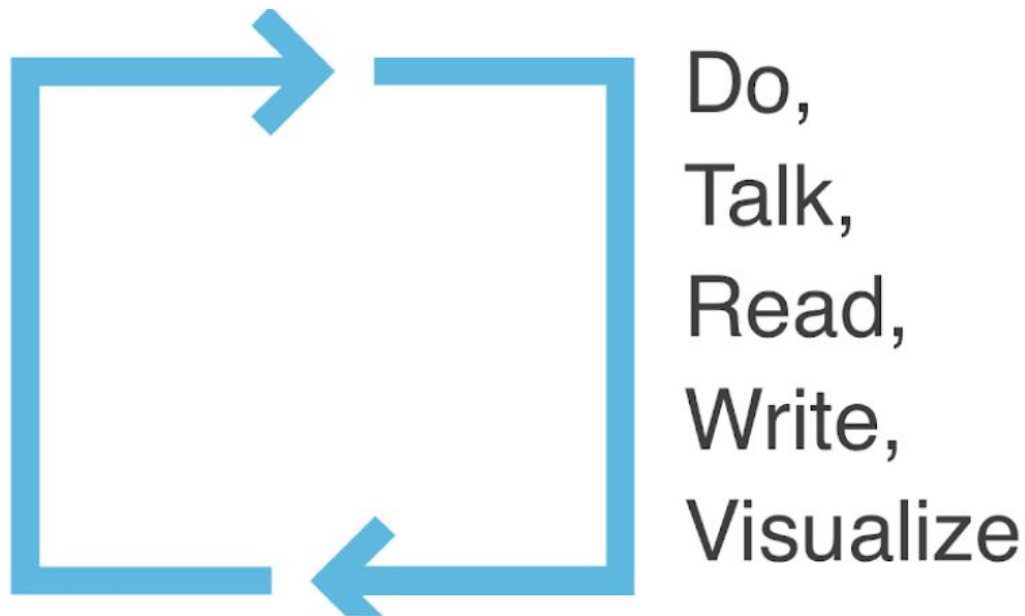

There is a woodpecker in the tree.

The woodpecker makes a tapping noise when it is getting food.

The woodpecker is getting food in the tree because the tree has bugs.

# What types of multimodal learning did you see?

# Culminating Activity

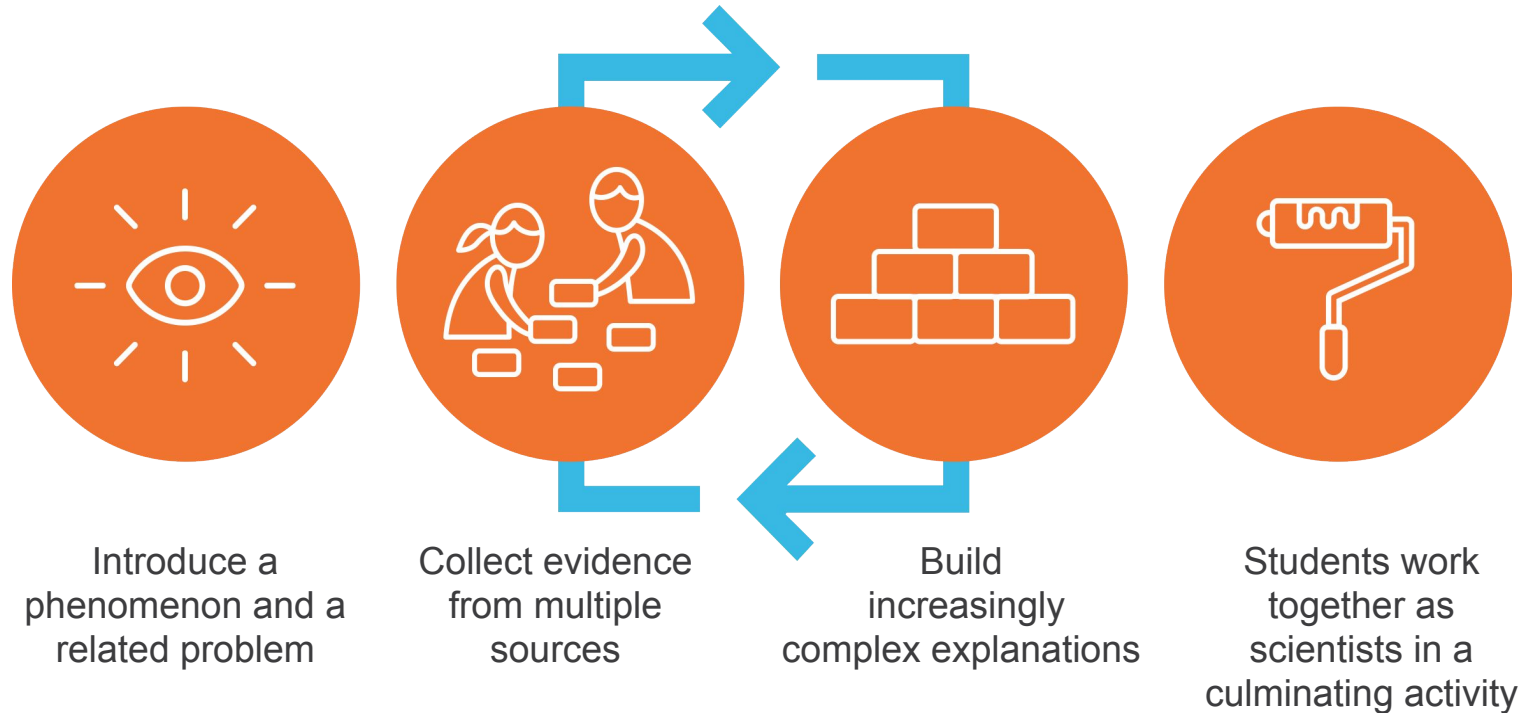

Students create pages for a class book about how animals use trees.

# What Scientists Do?

# How does the Amplify Science Instructional Approach support Unit Coherence?

# Plan for the day

- Framing the day
- Understanding an exploration
- Exploration and activity progressions
- **Preparing to implement**
- Closing

| Notes         | The Amplify Approach          |
|---------------|-------------------------------|
| Exploration I | Implementation Considerations |

# Flexible Implementation: Activity Structures

- When might you use each of the implementation structures?
- Which of these do you see working best for your students? Why?

**Small Groups:** Teacher introduces the activities in small groups as part of the centers/small group time. (Optional: making the previously covered activities independent centers)

**Large Group/Multiple Centers:** Introduce the activities first in large groups, then once they have all been done together open them up to independent centers

**Large Group/Single center:**  
Introduce the activity as a large group and then open them individually to independent centers

# Exploration One: Activity Stations

How would you introduce these activities in your classroom?

## Activity One:

Observe the tree model and think about how the students would make the different types of leaves and add them to the model. Discuss how the model is similar and different to a real tree.

## Activity Two:

Listen to different noises and make drawings of ideas about what made each noise. Look for patterns in the data you've recorded

## Activity Three:

Read the next section of The Noisy Tree in which the girl makes new observations of the tree in the park.

## Activity Four:

Observe pictures of trees and notice there are animals in many of the trees. Use the language frame to describe your observations.

# Questions?

# Workshop goals reflection

By the end of this workshop, teachers will be able to:

- Articulate the Amplify Science Approach including multimodal learning
- Describe the storyline of the unit
- Identify how the progression of lessons/activities build upon one another to help students build increasingly complex understandings
- Utilize the flexible implementation structures to plan for the first unit

**1-** I'm not sure how I'm going to do this!

**3-** I have some good ideas but still have some questions.

**5-** I have a solid plan for how to make this work!

# Upcoming LAUSD Office Hours

**Final opportunity for this school year:**

- Thursday, May 27 from 4:30-5:30pm
