# mCLASS with DIBELS<sup>®</sup> 8th Edition Reporting guide for North Carolina Schools

# Welcome

mCLASS gives you detailed insight into your students' reading development across foundational literacy skills. In this guide, you will find a wealth of valuable reporting information that mCLASS provides for everyone from classroom teachers and literacy specialists, to principals and district leaders, as well as parents and guardians at home.

## EDUCATOR INSIGHT

“In which basic early literacy skills are students most proficient, and in which are they least proficient?”

## Classroom Skill Summary

The Classroom Skill Summary is a dashboard showing benchmark performance on each skill. Teachers can use it to determine which skill areas need instructional focus at a classroom level.

Beginning of Year		Middle of Year	End of Year	Summary				Grade 1 ▼
		Composite	Phonemic Awareness PSF	Letter Sounds NWF-CLS	Decoding NWF-WRC	Word Reading WRF	Reading Fluency ORF	
<b>Class Summary</b>	Well Below Benchmark	20% 3 Students	13% 2 Students	27% 4 Students	7% 1 Student	20% 3 Students	7% 1 Student

<b>0</b> In Progress	Above Benchmark	20% 3 Students	13% 2 Students	40% 6 Students	0% 0 Students	20% 3 Students	7% 1 Student	

Both the percentage and number of students in each performance category are displayed for each skill assessed.

# Classroom Benchmark Summary

The Classroom Benchmark Summary is a classroom-wide view of overall reading performance. Teachers can use this report to determine if composite scores improved, declined, or remained the same each semester.

“How many of my students improved in each benchmark period?”

Beginning of Year		Middle of Year		End of Year		Summary
		Beginning of Year	Middle of Year	End of Year		
<b>Class Summary</b>  15/15 Students Assessed  0 Not Assessed  0 In Progress	Well Below Benchmark	20% 3 Students	7% 1 Student	0% 0 Students

This report focuses on composite scores for each time of year.

“Which skills  
have my students  
mastered?”

“Which skills  
should my  
students continue  
practicing?”

## Detailed Benchmark Performance

Teachers can see each student's performance during the current school year, on each subtest as well as the overall composite. The benchmark goal displays below the subtest name when applicable.

## Dyslexia Screening and Risk Indicator

Identify students who are at risk for reading difficulties, including dyslexia, based on their results for the Dyslexia Screening Measures (Vocabulary, Spelling, Rapid Automatized Naming). A risk indicator icon ⓘ marks which students are at risk.

Educators can use the additional information collected from these measures to develop and implement targeted interventions for students at risk.

# Progress Monitoring Summary

See which subtests have been assessed since the most recent benchmark assessment, how students performed on the three most recent progress monitoring assessments for each measure, and which students have not been progress monitored since the benchmark assessment.

The Aimline displays the three most recent progress monitoring scores on a slope to show whether students are on track to reach the next benchmark goal.

“Which students are making adequate progress toward the next benchmark goal?”

“What is the minimum amount of growth my student needs to reach their goal by the next semester?”

## Goal Setting tool

The Zones of Growth (ZoG) analysis uses a rich set of national data to determine student goals for the next benchmark period. Teachers can use the Goal Setting tool to view these recommended goals or modify the default goals for individual students as they see fit, if the default goal is too challenging or not challenging enough.

Zones of Growth							
Grade 1 Last Name, First Name	Skill	Start - MOY	Growth Rate			End - EOY	
		Score	Average	Above Average	Well Above Average	Goal	
Greer, Nicolas	Letter Names LNF	30 Well Below	34 - 40 ○	41 - 46 ○	47+ ●	47 <i>Saved</i>

	Reading Accuracy ORF-Accu	27% Well Below	68 - 76 ○	77 - 85 ○	86+ ●	86	

The flag indicates the benchmark performance level the student will reach by the next benchmark period for that skill, if they achieve the growth rate indicated by the purple dot.

Even if students did not meet the goal, teachers can offer positive reinforcement about the growth they made by comparing the number of points needed to reach the goal with the number of points students actually achieved.

“Are my students receiving effective instruction?”

“Should I adjust my tactics to help students catch up?”

“Which skills have students with similar assessment results already mastered? Which do they need to work on?”

## Small Group Instruction

The mCLASS instructional tool automatically groups students based on assessment results and response patterns. Teachers can see that each group is associated with one main skill, and the name of the group (e.g., Phonemic Awareness) is based on a sub-skill that students need to master.

**PHONEMIC AWARENESS**

GROUP

**Phonemic Awareness** 5 Students

**Can** segment some word parts.

To build fluency in orally segmenting words, engage in word segmentation activities emphasizing accuracy and gradually progress to fluency by systematically decreasing the response time in which the student is expected to produce the sounds. Provide students exposure to vocabulary and comprehension instruction through teacher read-alouds and oral instruction.

**Prerequisite skills:**

- Hearing environmental sounds.

**Need to work on** identifying first, middle, and last sounds in words with 3+ phonemes; continue building fluency in phoneme segmentation.

**ELL Considerations**

Both the sounds and the syllable structures of students' native languages may differ from those in English, making it more difficult to hear and produce the sounds of English. During instruction, consider cross-language transfer; phonemes that are transferable and non-transferable from a student's native language to English. Students will likely be more accurate identifying phonemes that are the same, and less accurate with those that don't exist, or that are similar but not the same as

The “Need to work on” section describes the skill deficits shared by students in this group, and can be used to target instruction.

# English Language Learner supports

The expanded instruction card displays more detailed information that can be used to plan instruction, including information tailored to ELL instruction. Each profile contains a description of the skills you can build on while targeting instruction, and sometimes includes prerequisite skills.

**Can** blend sounds into CVC words as whole words, but not consistently.

**Need to work on** specific letter sounds and on reading whole words fluently.

Students may have repeatedly missed a particular letter or letters and need reinforcement activities on these particular letter sounds in isolation and in the context of words. Use the observed patterns below from NWF results for further identification of specific letters/sounds that need to be reviewed.  
  
Provide students exposure to vocabulary and comprehension instruction through teacher read-alouds and oral instruction.

**ELL Considerations**

Native language and literacy should be assessed for potential transference to English language and literacy. Include modeling, examples, and practice sounds and letter combinations and words that include the phonic elements from both languages.

Each group contains specific information for ELLs based on students' response patterns.

“How can I support my English Language Learners in acquiring this skill?”

“Which activities  
can I use with this  
group of students?”

## Small Group Activities

The observed patterns checklist contains observations that teachers can use to filter the activities displayed below. The activities section includes recommended activities for reinforcing the skills needed by students in the group.

## Intervention Progress Monitoring Report

This report (available to educators using mCLASS Intervention) includes recent progress monitoring data and intervention details such as the number of Bursts received, Burst group name, Burst instructor name, and classroom teacher's name.

Teachers can identify Burst students who may need a different intensity (e.g., smaller group size) or new instructional approach (e.g., different Tier 3 intervention).

# Intervention Group Report

This report (for educators using mCLASS Intervention) helps intervention coordinators evaluate the homogeneity of each group and determine when regrouping is necessary.

“Which students are ready to advance to the next group?”

Interventionists can review a snapshot of students' skill levels each time a 10-day lesson plan was generated.

## Probe Details

Teachers can click a student's score from any report view to open the assessment details report, which includes a documented record of student responses. The details are analyzed to reveal significant response patterns and recommend targeted group and individual instruction.

The running girl bar at the top of each report indicates where the student's score falls relative to the benchmark goal.

“What types of spelling patterns or words does this student need to practice?”

“Is this student progressing toward the next benchmark goal?”

“Is differentiated instruction necessary?”

## Progress Monitoring Graphs

Teachers can review a student's benchmark and progress monitoring scores for the entire year. Each skill is shown in a separate view.

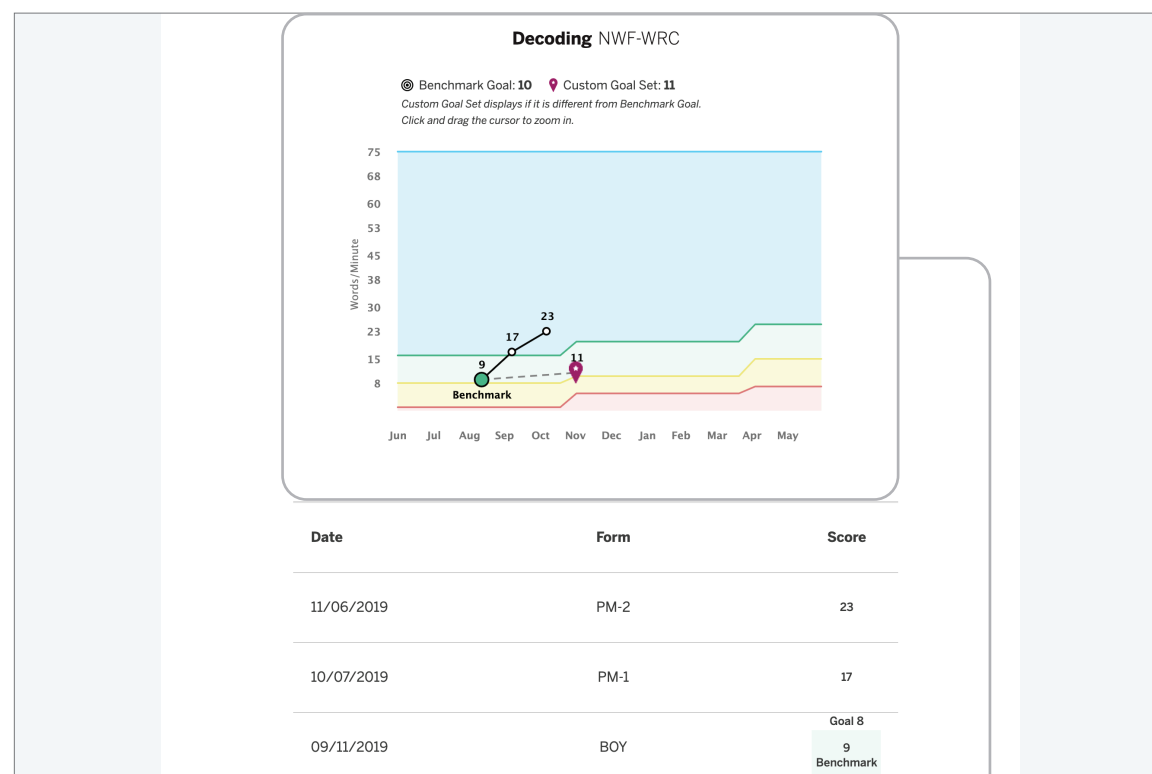

Teachers can zoom in on the graph to see a clearer view of the data points.

# Custom goals on Progress Monitoring Graphs

Teachers can track the progress students are making toward their individual goals for each skill on the graph. A pin icon on the graph represents a modified individual goal when it is less than or greater than the default “At Benchmark” goal.

Goal setting is a helpful way of motivating students to achieve a specific outcome. When students see their progress toward a goal during check-ins with their teacher, they can celebrate the growth they have made.

“Is differentiated instruction needed?”

“What patterns have emerged from this student’s assessments?”

## Individual Instruction

Teachers can review significant patterns that emerge from the student’s assessment results in a single view, and download activities that address those patterns.

“What activities can this student do that will help move them on to more advanced skills?”

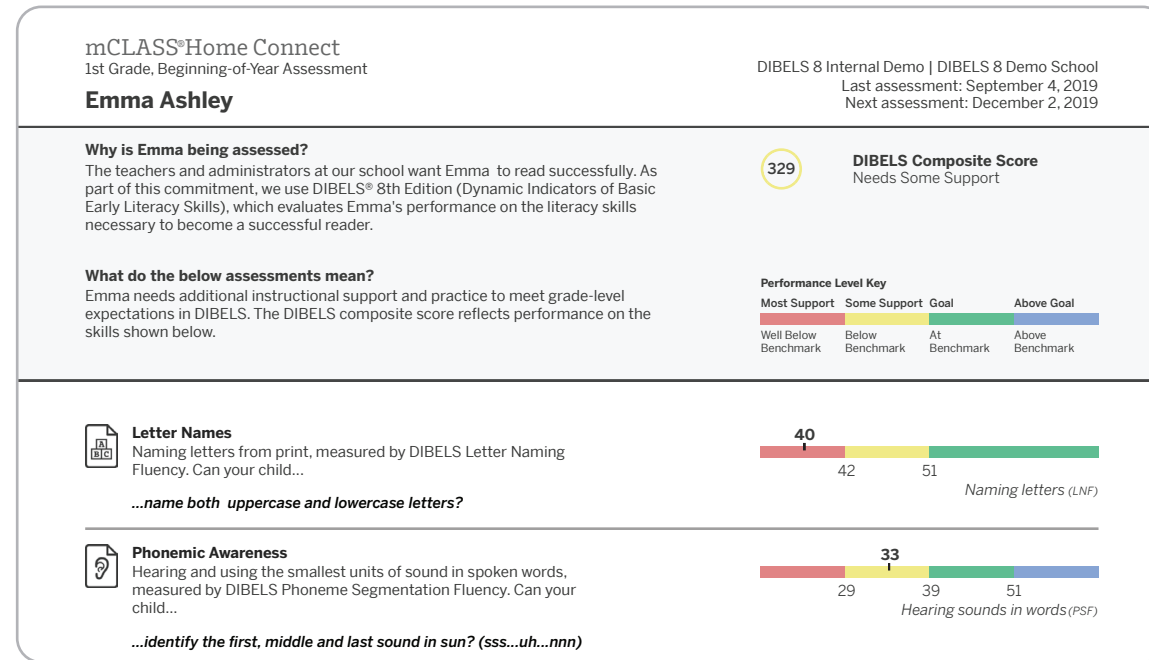

“What skills should my child be developing?”

“How do these assessments help my child learn how to read?”

## Home Connect®

Teachers can download a letter with student assessment results and analysis to send home to parents and guardians, or to use as a basis for discussion at conferences. Home Connect letters describe how the measures assessed relate to skills development.

Letters are available in both English and Spanish.

# Home Connect Activities

The Activities section of the Home Connect letter contains a list of recommended activities based on the skill areas where the child needs support. Parents and guardians can use this section to support their child’s skill development.

“How can I help my child practice reading skills at home?”

Emma Ashley 1st Grade, Beginning of Year

**Activities for Emma**

Even if you have just a few minutes each day, you may be surprised by how much you can help Emma learn to read. Here are some activities we recommend based on Emma’s most recent mCLASS reading test. Most of these activities can be done just about anywhere. Feel free to change them a bit to match Emma’s interests or to fit your schedule.

**Where Emma needs support**

**Phonemic Awareness**

Hearing and using the smallest units of sound in spoken words

**Find Specific Sounds**

Have your child and other family members listen for words with a specific sound in family conversation or on television and radio programs, such as words that start with the *s* sound or that end with the *k* sound. Have your family members share their heard words and list them on a piece of paper.

**Break the Words Apart**

Help your child take spoken words apart and put them together. Have your child separate the sounds in simple three-letter words, listening for beginning, middle, and ending sounds. For example, pronounce *mom* as follows: *mm-o-mm*. Next, ask your child to blend sounds

Activities in the letter are designed for use at home. A link to the Home Connect site provides activities for At Home or On the Go.

Help your child pick out the first sound in words, an important step in learning to read. Give your child one minute to name as many objects, people, foods, etc that start with a given sound, such as <i>sss</i> . When the minute is up, have them try to beat their score with another sound, such as <i>sss</i> .	Have your child count the number of words in a spoken sentence. Say a sentence. (Example: "Let's go to the park.") Have your child tell you the number of words in the sentence. Switch roles, allowing your child to give you a sentence and have you say the number of words it.	Play a mystery game in which you are calling your child's name or looking for an object around the house. For example, say, "I'm thinking of someone whose name begins with (say the sound for the letter <i>h</i> )," or "I'm looking for an item that begins with (say the sound for the letter <i>g</i> )."

## EDUCATOR INSIGHT

“Which districts, schools, or programs need additional resources to support student growth and administration fidelity?”

## Reporting and Analysis Suite

The Reporting and Analysis Suite presents different views of assessment results to help support school leaders in their day-to-day decisions regarding intervention, instruction, and resource allocation.

School leaders can use the My Reports feature to create a custom dashboard and save reports for future reference, or view reports sent by colleagues.

School leaders can customize any report to show data based on a particular View, Population, Time, Measure, or Student Demographic, using a broad range of filters.

The interface is divided into four main sections for customization:

- View:**
  - Segment Results by: Program (dropdown)
  - Grade Divider: On (dropdown)
- Population:**
  - Show Students Enrolled: ☐ Now ☒ On Test Day (with info icon)

  - Level Filter: All Levels (dropdown)

Below these sections is the **Student Filters** section, which includes a "Clear Filters" button and a grid of 12 filters:

Each report features pre-selected parameters that you can modify to create the data view that best meets your needs.

“What are the performance trends among students in a particular district, program, grade, or demographic?”

## Reporting and Analysis Suite: Comparing Measures

The Comparing Measures report analyzes how one group of students performed on multiple assessment measures across one or more time periods. Instructional leaders can see the number or percentage of students who achieved a specific performance level or goal on each measure.

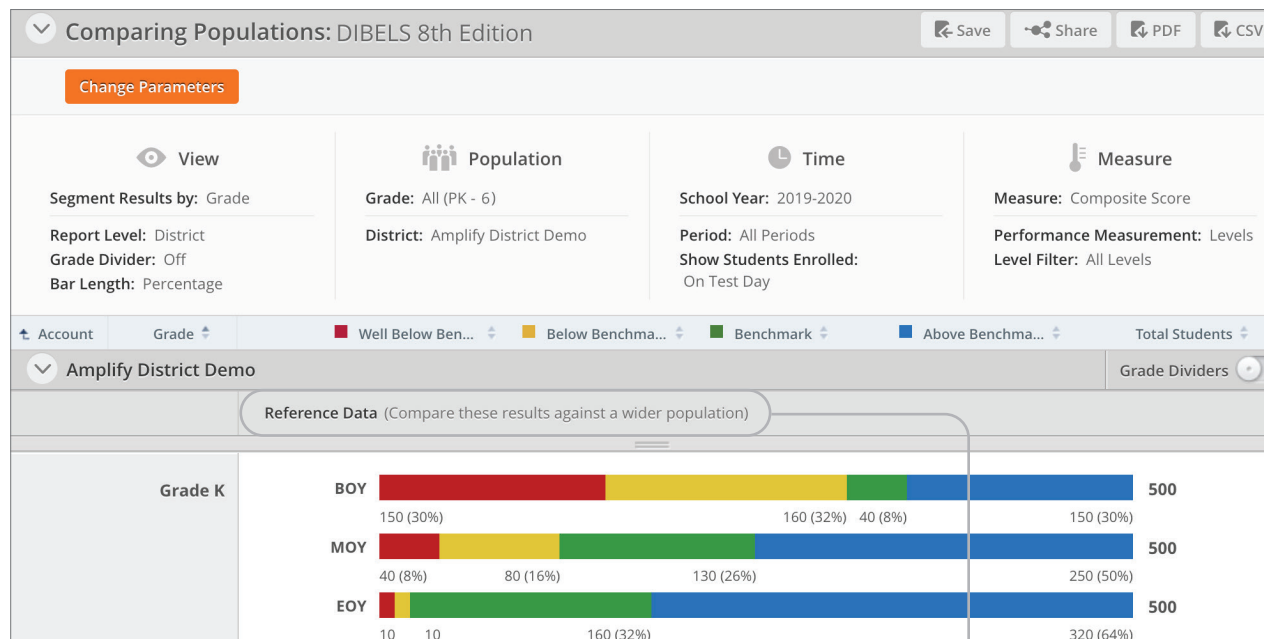

Clicking any bar segment shows the students who comprise that benchmark performance level.

# Reporting and Analysis Suite: Comparing Populations

The Comparing Populations report helps school leaders analyze assessment results for different student populations, such as students in different schools, grades, or demographic categories.

“How have different populations changed over time?”

Click the Reference Data option to compare your report population to a broader subsection of the population or to the complete population, such as a single district, or all districts across the state.

“Where should resources be focused to ensure the timely completion of required assessments?”

## Reporting and Analysis Suite: Benchmark Completion

School leaders can use the Benchmark Completion report to track the number of students who have completed the beginning, middle, or end of year benchmark assessment.

Drill down to view the same data one level down in the institutional hierarchy by clicking the municipality, district, school, or teacher label in the population column.

# Reporting and Analysis Suite: Correlation

The Correlation Report helps school leaders track student performance over time on a specific measure, or compare student performance on two different measures.

School leaders can compare student results for a grade or school against results for the entire district.

“How effective have institutions and teachers been at moving students among performance levels?”

# Reporting and Analysis Suite: Download Your Data

Download Your Data reports help school leaders flexibly analyze assessment data across all districts and programs by exporting student records into a CSV file, which can be uploaded directly into student information systems.

“Which districts have met statewide requirements for student growth?”

The screenshot shows the 'Download Your Data' page in the Amplify Reporting suite. The top navigation bar includes the Amplify logo, 'Reporting', and user information (Yolanda Rodriguez, Log Out). Below the navigation bar, there are tabs for 'My Reports', 'My Dashboard', and 'View My Data'. The main content area is titled 'Download Your Data' and contains a form with the following filters:

- Assessment:** DIBELS 8th Edition
- Programs/Districts:** Radio buttons for 'Programs' and 'Districts' (selected). Below is a 'District' dropdown menu set to 'All Districts'.
- Grade:** A dropdown menu set to 'All Grades'.
- School Year:** A dropdown menu set to '2019-2020'.
- Period:** A dropdown menu set to '19-20 BOY'.

At the bottom of the form are 'Clear' and 'Download' buttons. To the right of the form, there are two informational boxes: 'Updates' (with a 'Learn more' link) and 'Data Dictionary' (with a 'Download' link).

Use the options on this page to refine the scope of the student results and enrollment data contained in your download.

“Which strengths and skill deficits do students with a similar performance level have in common?”

## Reporting and Analysis Suite: Student Lists

Clicking a bar segment, number, or total within a report opens the student list, which displays each of the students along with an overview of the assessment data used to generate the report.
