# Productive Discussions

Having a productive science discussion doesn't just happen. It requires many people to participate and be thoughtful about how they participate. These sentence starters can help you have a productive discussion.

### Gathering ideas

- Does anyone have an idea to share?
- My idea is \_\_\_\_\_.
- I'm wondering about \_\_\_\_\_.
- What if we tried \_\_\_\_\_?

## Clarifying ideas

- Can you say that in a different way?
- I have a question about \_\_\_\_\_\_.
- I think what you mean is \_\_\_\_\_.
- Tell me more about \_\_\_\_\_\_.

## Arguing ideas

- Does anyone have a different idea?
- I disagree because \_\_\_\_\_.
- I agree, except \_\_\_\_\_\_.
- Is \_\_\_\_\_ possible?

## **Building on ideas**

- Is that like \_\_\_\_\_?
- Can you say more about that?
- I can add to that idea: \_\_\_\_\_.
- That idea reminds me of \_\_\_\_\_.

## Supporting ideas

- Why do you think that?
- Is there evidence to support that idea?
- I agree because \_\_\_\_\_.

# Goals for Exploratory Discourse

#### 1. Notice and wonder

- Look at this!
- I have an idea. I think \_\_\_\_\_.
- I have a question. I wonder if \_\_\_\_\_.
- What if we tried \_\_\_\_\_?
- How does that part work?
- What does that symbol mean?
- What does that word mean?

#### 2. Build off each other's ideas

- Can you do that again? I want to see it one more time.
- What were you trying to do?
- Can we do that a different way?
- Is that like \_\_\_\_\_?
- Can you say that again?
- That reminds me of \_\_\_\_\_.
- Is that like when \_\_\_\_\_?
- What could we do to test your idea?
- What else can we do?

# Goals for Explanatory Discourse

## 1. Connect your ideas

- I agree with you and I have another piece of evidence.
- I agree with some of what you said because \_\_\_\_\_.
- I don't agree because \_\_\_\_\_.
- I think about it a different way. I think \_\_\_\_\_.

## 2. Make thinking visible

- When did you see that happen?
- Which of our evidence supports that idea?
- Will you make a diagram that shows what you mean?
- Will you write out the math you're using?
- How did you figure that out?
- Will you share why you're thinking that way?

### 3. Deepen your investigation

- What could we do to test your idea?
- This data doesn't fit. What do we make of that?
- Where else can we find information?
- If our idea is right, then we should be able to \_\_\_\_\_.

# Analzying Data Sounds Like

- 1. I see a pattern. I notice \_\_\_\_\_.
- 2. I see an anomaly. I notice \_\_\_\_\_.
- 3. I'm surprised by \_\_\_\_\_.
- 4. I wonder if there is an error \_\_\_\_\_.
- 5. I notice there are differences \_\_\_\_\_.
- 6. I notice there are similarities \_\_\_\_\_.
- 7. I wonder if \_\_\_\_\_.
- 8. I wonder why \_\_\_\_\_.
- 9. I wonder how \_\_\_\_\_.
- 10. Based on the patterns I see, I predict \_\_\_\_\_.
- 11. This is the highest \_\_\_\_\_. This is the lowest \_\_\_\_\_.
- 12. I have an idea about \_\_\_\_\_.
- 13. Based on the data, I think \_\_\_\_\_.
- 14. What do you think explains \_\_\_\_\_.
